

# Look inside for ways to round up all your IT pains.

IBM Software Catalog  
United States  
Fall 2006

- **IBM Express Middleware** — Designed, developed and priced to meet the needs of midsize companies. See page 7.
- **Information Management** — DB2 9 is the next-generation hybrid data server with optimized management of XML and relational data. See page 16.
- **Lotus** — Lotus Sametime 7.5 can help improve collaboration and productivity in real time. See page 23.
- **Rational** — Deploy a complete solution for developing software and software-based systems with IBM Rational Software Development Platform. See page 27.
- **Tivoli** — Manage identities, control access and reduce risk with security management solutions. See page 25.
- **WebSphere** — WebSphere MQ is an advanced messaging backbone that helps establish the connectivity layer in your SOA. See page 11.

# Which IT pain is the culprit in your enterprise?

**NEW SOFTWARE. JUST WHAT YOU NEED TO ADDRESS NEW BUSINESS AND IT CHALLENGES — OR OLD ONES.**

IBM realizes that no sooner do you tackle one pressing issue than another one arises. That's why we never stop working on developing software that helps you support the business priorities you have today — and the ones you'll face tomorrow. Learn about how IBM software can help your business.

**IF YOUR PAIN IS:**  
Inflexible electronic forms

**YOU MAY NEED:**  
IBM Workplace Forms™

Download free trial code at  
[ibm.com/software/info/workplaceforms](http://ibm.com/software/info/workplaceforms)

**IF YOUR PAIN IS:**  
Managing XML data

**YOU MAY NEED:**  
IBM DB2® 9

Take the DB2 9 test drive at  
[ibm.com/software/info/trydb29](http://ibm.com/software/info/trydb29)

**IF YOUR PAIN IS:**  
Security gaps

**YOU MAY NEED:**  
IBM Tivoli® Access Manager Enterprise Single Sign-On

Download a white paper at  
[ibm.com/software/info/tivolioffer](http://ibm.com/software/info/tivolioffer)

## IBM SOFTWARE PORTFOLIO

The IBM software portfolio is an award-winning, comprehensive and integrated set of solutions based on open standards.

**Information Management** software  
Delivering the business value of information

**Lotus** software  
Integrating people with business processes

**Rational** software  
Software and system development

**Tivoli** software  
Infrastructure management

**WebSphere** software  
Transaction management and integration

## HOW TO PURCHASE

You can choose from two convenient ways to order software in this catalog.

- 1. By phone** — Call **877.426.7249**, Monday through Friday from 8 a.m. to 8 p.m. ET.
- 2. Online** — Visit [ibm.com/software/catalog/fall2006](http://ibm.com/software/catalog/fall2006) to purchase by credit card.

## ORDER FULFILLMENT

For your convenience, purchases may be fulfilled by electronic download. If you prefer product CDs or require product documentation, please request when you place your order by calling **877.426.7249**.

## PRODUCT PRICING

The prices listed in this catalog include one license and 12 months of software maintenance and reflect suggested retail price. Your prices may be lower based on your purchase history or membership in IBM Passport Advantage®.

If you are not a member of IBM Passport Advantage, join today for future purchases, and you may qualify for additional savings. This program will consolidate your account with a common set of agreements, processes and tools. Learn more at [ibm.com/software/passportadvantage](http://ibm.com/software/passportadvantage)

## EVERYTHING YOU NEED FROM A TO SYSTEM Z.

Although the range of software in this catalog can help you tackle myriad business challenges, there is an online repository of IBM software for System z™.

For information about IBM System z software — robust online business tools and software for the leading System z mainframe platform — please visit [ibm.com/software/zseries](http://ibm.com/software/zseries)

# There's a better way to manage the business of IT

## COMPLIANCE, SECURITY, PRODUCTIVITY, CONTINUOUS UPTIME, PRODUCT ROLLOUTS, PATCHES, UPDATES, MAINTENANCE

If you had any more balls in the air, you wouldn't be running an IT organization. You would be a professional juggler.

IBM Service Management helps align your IT organization — and all its related functions — with your business objectives. By bringing together people, processes, information and technology, IBM Service Management helps you:

- Prioritize tasks and increase flexibility.
- Ensure service continuity and get products to market more quickly.
- Automate repeatable processes and more effectively manage compliance.

IBM Service Management is about responding to changes — and planning for the future — more efficiently and effectively than ever before.

### CHECK OUT THESE POWERFUL SERVICE MANAGEMENT PRODUCTS

Application releases stunting your productivity? Check out IBM Tivoli Release Process Manager and learn how to automate your release management processes. See page 37.

Configuration and change management is half the battle in maintaining efficiency. Read more about IBM Tivoli Change and Configuration Management Database (CCMDB) on page 37.

Log on to [ibm.com/software/info/itsm](http://ibm.com/software/info/itsm) to get started with IBM Service Management.

## New license structure delivers flexibility, simplicity

IBM has unveiled a new “value unit” license structure to replace the “per processor” license structure, which impacts IBM middleware products available on Passport Advantage.\*

### YOU TOLD US ABOUT YOUR CHALLENGES, AND WE LISTENED

Today customers tell us that the widespread adoption of multicore chips has meant more complex and less-flexible licensing structures, managing different licensing requirements for each kind of technology and fractional licensing to provide necessary licensing granularity.

### THE NEW PLAN

IBM has simplified the licensing process. Here's how it works. Products formerly licensed using the per processor metric will now be licensed in value units. The three broad levels in the prior structure and all existing processors have been assigned to one of those tiers. For each product, customers will need to acquire the appropriate number of value units for the level or tier of the specific processor on which the software is deployed.

Our new value unit licensing benefits you by creating a simpler, more flexible, more intuitive licensing structure, avoiding fractional licensing for multicore chips.

For questions about the new license structure, contact your IBM representative.

\*There will be no price changes for middleware on existing processors.

## Two ways to find the software you need in this catalog.

1. **By category.** Is your primary interest security solutions or application servers? Then go straight to those sections and quickly find what you need. Contents are located on right-hand pages throughout this catalog.
2. **By IBM software brand and operating system.** Already know what you want? Consult the convenient chart on pages 40-41 to locate products alphabetically and to verify supported operating systems.

Visit the online catalog at [ibm.com/software/catalog/fall2006](http://ibm.com/software/catalog/fall2006) for more software and related technical information.

### KEEP YOUR EXISTING IBM PRODUCTS UP WITH THE TIMES. RENEW SOFTWARE MAINTENANCE.

**SAVE TIME.** With software maintenance, you get:

- **Unlimited access to IBM Software Support Centers worldwide.**
- **Emergency support for critical problems 24x7.**

**SAVE MONEY.** Software maintenance gives you:

- **Upgrade protection.**
- **Trade-up options.**

For software support, visit [ibm.com/software/info/support](http://ibm.com/software/info/support)

# IBM WebSphere: your entry point to SOA

We've heard this story many times. The only thing constant in your organization is that everything constantly changes. You've got application upon application, and yet none of them seems to efficiently work together. As a result, your business processes are complex and inflexible. Some days, if you can keep the chaos to a minimum, you feel successful. But imagine if the numerous applications across your infrastructure were transformed into services that could be used as building blocks — to respond to ever-changing business conditions. You can, with service oriented architecture (SOA). SOA can help you do things like:

- Optimize and manage business models and processes.
- Respond faster to new business-driven opportunities.
- Reduce IT development and maintenance costs.

**Don't those sound like ways to measure success that feel a little more, well, successful?**

## GET STARTED!

The best way to get started with SOA is right at your fingertips. IBM offers a full portfolio of products to help you get started with SOA:

### To model:

IBM WebSphere® Business Modeler helps organizations fully visualize, comprehend and document business processes. See page 13.

### To assemble:

IBM WebSphere Integration Developer helps leverage existing IT resources as service components for reuse and efficiency. See page 12.

### To deploy:

IBM WebSphere Application Server delivers the security-rich, scalable, resilient infrastructure you need for an SOA. See page 10.

### To manage:

IBM WebSphere Business Monitor enables you to monitor business processes in real time, providing a visual display of business process status. See page 13.

Learn more about these and other products that can help you achieve SOA. View the full IBM SOA Software Catalog at [ibm.com/software/info/soaswcatalog](http://ibm.com/software/info/soaswcatalog) to find out about the five logical entry points into SOA: people-centric collaboration, business process management, information as a service, connectivity and reuse. For more information about SOA, visit [ibm.com/software/info/soalaunch](http://ibm.com/software/info/soalaunch)

## TAKE THE SOA ASSESSMENT

Are you ready for SOA? Find out today.

Visit [ibm.com/software/info/soaassessment](http://ibm.com/software/info/soaassessment) to take the IBM SOA Assessment.

**SOLUTION #301**

**Data storage is a nightmare.  
Administrative costs are high.  
XML data is crowded in with everything else.  
SAP deployments couldn't be clunkier.  
What's an IT manager to do?**

## There's a better way to manage XML data: IBM DB2 9

*"I think this leaves Oracle and Sybase ... well behind the curve, with Microsoft and the others more or less out of sight. What this release [DB2 9] will allow you to do is to build applications that handle both XML and relational data much more easily, without losing any of the richness that this implies, and without degrading performance."*

Philip Howard, Bloor Research

XML has indisputably changed the way we handle electronic documents and organize data. But along with this great technology has come another information management headache: how to deal with storage of XML data in addition to relational data.

Welcome to the world of DB2 9. The all-new DB2 9 is the world's first hybrid data server technology designed with both pureXML™ data management and conventional relational data capabilities.

What does this mean to you? DB2 9 can actually help you unlock the latent potential of XML by leveraging the performance, development time and cost savings you can reap from pureXML. DB2 9 can also help you:

- Reduce data storage requirements by up to 80 percent and improve system performance.
- Minimize administration of SAP deployments.
- Reduce administrative costs with adaptive memory management and automatic storage management.
- Reduce risk of unauthorized access with an innovative label-based security model.
- Improve developer productivity with the new Developer's Workbench.

Read more about DB2 9 on page 16.

### TAKE THE DB2 9 TEST DRIVE

Don't take our word for it — try out DB2 9 for yourself. Go to [ibm.com/software/info/db29](http://ibm.com/software/info/db29). You can also download our brochure, "Manage your business, not your data server," or join our complimentary Webcast about leveraging XML data.

Do you spend more time looking for the right information than acting on it? Struggling with duplicate information and multiple versions of the “truth”? Can you really trust the information you have? What if there was a way to bring all of that information together and deliver it in a consistent, reusable and trustworthy way.

## Make your data work for you. Instead of the other way around.

VIEW AN INTERACTIVE PRESENTATION OR DOWNLOAD A WHITE PAPER TO LEARN MORE!

Learn more by viewing the interactive presentation, “Information Server Overview,” or downloading the complimentary white paper “Driving information-led business innovation with IBM Information Server,” available at [ibm.com/software/info/infoserver](http://ibm.com/software/info/infoserver)

The pressure is on. You've got to know:

“Who are our most profitable customers?”

“How many orders have we received today for our new product?”

“What were the peak days for online orders last month?”

And you've got to know today. In fact, right now would be even better.

There's nothing worse than needing answers quickly — and knowing the information is there somewhere — but not having a consistent and trusted way to access it. When you're able to take control of your data and deliver it at the right time and in the right context to the people, processes and applications, you can help your organization:

- Reduce costs.
- Streamline operations.
- Manage risk.
- Make better business decisions.

IBM Information Server can help you get the answers you need. It enables you to get more value from complex, heterogeneous information spread across your business. It enables your organization to integrate disparate data and deliver trusted information consistently and securely throughout the enterprise — so it can be used in new ways to drive innovation, increase operational efficiency and lower risk.

A comprehensive, unified foundation for enterprise information architectures, Information Server enables you to understand, cleanse, transform and federate your information — helping you to deliver consistent and reusable information services (within a service oriented architecture) and auditable data quality throughout your organization.

# Accelerate global software delivery with IBM Rational® Software Development Platform

Software development is difficult enough without the barriers to delivery and siloed processes you face every day. There's the communication issue between organizations. There's the lack of traceability as well. And then of course the complete lack of collaboration between these silos. Top it off with geographically disbursed teams, and you've got a distance and language gap that makes it nearly impossible. But now there's help.

Welcome to the latest version of IBM Rational Software Development Platform. With closed-loop software delivery, flexible, integrated test management for distributed teams and extended globalization support,

it eliminates the silos between development, testing and deployment. The platform helps you:

- Reduce risk and cost with better visibility and traceability.
- Reuse assets and speed application delivery with better process automation and integration.
- Free geographically distributed team members to participate productively.
- Better manage development.

**SEE FOR YOURSELF WHAT THE NEW IBM RATIONAL SOFTWARE DEVELOPMENT PLATFORM CAN DO.**  
Take advantage of special offers at [ibm.com/software/info/rational/launch](http://ibm.com/software/info/rational/launch)

## Improve global software delivery process efficiency with IBM Rational Build Forge™

The pressure is on, and the message is clear: deliver products and services faster than ever, or succumb to your competitors. But there's just one catch. Not only do you have to build these processes, you have to document the process to manage compliance. And you must do all of these things while staying within your budget and existing resources.

Build Forge technology with IBM Rational software can help you do just that. Build Forge software helps software development teams improve their build and release processes by documenting what was created, how it was developed and where the application was deployed. Use Build Forge with Rational products throughout the application development life cycle to:

- Automate.
- Track.
- Manage compliance.
- Analyze.

Get more information at [ibm.com/software/info/buildforge](http://ibm.com/software/info/buildforge)

### WHITE PAPERS TELL THE STORY

- Download these white papers to learn more: "Process Automation Solutions for Software Development with IBM Rational Build Forge" and "Agile Configuration Management for Large Organizations." Read these at [ibm.com/software/info/buildforge/papers](http://ibm.com/software/info/buildforge/papers)
- Read more about these products on pages 27-31 of the catalog.

Our problem isn't lack of talent. Our team is pretty exceptional, in fact. We just need help getting more things done.

## Introducing IBM Lotus® Sametime® 7.5. Real-time. Right now.

### SEE FOR YOURSELF

Go to [ibm.com/software/info/sametime](http://ibm.com/software/info/sametime) to see Lotus Sametime 7.5 in action.

E-mail, ringing phones, instant messaging, meetings that last forever. You've got the tools and you've got the talent, but you need more. More answers, more productivity, more peace of mind and more sanity in the workday.

IBM understands. To get true productivity, your team needs real-time collaboration, right now. Lotus Sametime 7.5 is the IBM platform for real-time business collaboration.

Lotus Sametime provides an effective, cost-efficient way of communicating, working together and being more productive by blending presence awareness, instant messaging and Web conferencing into one smart solution.

Lotus Sametime 7.5 comes with more than 150 new features, including:

- Built-in Voice over IP.
- Streamlined Web conferences.
- Managed public IM network connections.

Built especially for businesses, Lotus Sametime helps minimize the security perils of doing business on unsecured public IM networks and the spiraling, unpredictable costs of so-called "pay-as-you-go" Web conferencing services.

Lotus Sametime 7.5 is the right choice — and the only choice — for real-time collaboration in the enterprise.

### SPECIAL OFFER!

Purchase a new IBM System i 520 Collaboration Edition and get a 20% discount off the IBM Passport Advantage list price for licenses of the following IBM Lotus software products — perfect for running e-mail, messaging, portals and more:

- IBM Lotus CEO Lotus Communication
- IBM Lotus Sametime
- IBM Lotus QuickPlace®
- IBM Lotus Domino® Document Manager
- IBM Software Solution for On Demand Workplace

Contact your IBM representative to learn more, or visit [ibm.com/software/info/systemi/offer](http://ibm.com/software/info/systemi/offer) (restrictions apply).

## IBM System i™

If you're painfully familiar with your servers because of all the time you spend nursing them through the traffic fluctuations, reconfigurations and reboots, consider IBM System i platform, the simple answer to your complex server problems.

The System i platform offers you simplicity, with every component designed to support business needs: security, with built-in virus resistance; flexibility, with support for Java™, Linux®, UNIX®, Microsoft® Windows® and IBM i5/OS®; and savings, with a less-complicated system that frees your IT operations to focus on other issues.

Think System i may be right for your organization? Go to [ibm.com/software/info/systemi](http://ibm.com/software/info/systemi) to learn more.

No matter the company size, getting everyone on the same page can be a huge challenge. Teams and projects are spread around different departments, databases — and managers (see right). The only thing that isn't spread around is more time. You need a way to bring everyone together. And you need enterprise-class solutions suitable for your growing (but not quite enterprise-size) business.

Just look what we've got in store.

## IBM Express Middleware

**SOLUTION #72**

**PAIN:**  
Need SMB-sized software

### **NEW!** IBM DB2 Express 9

The ideal entry-level data server. Suitable for managing transaction processing for both relational and pureXML data or handling complex query workloads on servers with up to two processors on Windows and Linux platform of choice.

D535PLL.....\$4,874 per CPU  
D52BKLL.....\$165 per authorized user  
D55TULL.....\$48.74 per value unit

#### Value-added features for DB2 Express 9:

**pureXML** — Optimizes storage of XML data to reduce costs and complexity.

D58UULL.....\$87.50 per authorized user  
D593PLL.....\$25 per value unit

**High Availability** — Maximizes data availability.

D58NJLL.....\$87.50 per authorized user  
D5910LL.....\$25 per value unit

**Workload Management** — Allocates resources effectively for better performance.

D58CMLL.....\$87.50 per authorized user  
D592QLL.....\$25 per value unit

**Performance Optimization** — Improves performance of complex query or OLAP workloads.

D588YLL.....\$87.50 per authorized user  
D5905LL.....\$25 per value unit

### IBM Informix® Dynamic Server Express Edition

Combines a self-managing database engine that provides the power, function and reliability needed for an on demand business with simplicity in packaging, installation and deployment—at a minimal investment cost.

D5509LL.....\$124 per authorized user  
D55NPLL.....\$48.74 per value unit  
D5507LL.....\$624 per server

### IBM DB2 Everyplace® Express Edition

Provides an attractively priced mobile database and synchronization solution.

D52XJLL.....\$474 per server  
D52XLLL.....\$98.75 per user

### IBM Lotus Domino Express

Complete messaging and collaboration solutions. Three offerings are available.

- IBM Lotus Domino Messaging Express offers e-mail, calendar and scheduling, team discussions, document sharing with basic workflow, integrated presence awareness and interactive online conversations.
- IBM Lotus Domino Collaboration Express includes all the features of Lotus Domino Messaging Express, plus a powerful platform to run custom or vendor applications.
- IBM Lotus Domino Utility Server Express allows virtually unlimited access to collaborative applications — not individual mail files.

Choose to provide access to your Lotus Domino applications through a Web browser or through a separately acquired IBM Lotus Notes® client.

#### Lotus Domino Messaging Express

D53V5LL.....\$96 per user/1,000 user maximum  
(both server and client software included)

#### Lotus Domino Collaboration Express

D52VQLL.....\$133 per user/1,000 user maximum  
(both server and client software included)

#### Lotus Domino Utility Server Express

D55MVLL.....\$25 per value unit/  
400 value unit maximum

## INSIDE

### IBM Express Middleware 7

Address the needs of midsize organizations with specially designed, affordable offerings.

**Application servers** 10  
Run interoperable applications on a proven, security-rich, flexible platform.

**Business integration** 11  
Provide a centralized infrastructure for application integration and business process automation.

**Commerce** 15  
Facilitate tailored marketing, sales and order processing with an integrated package.

**Information management** 16  
Store, access and analyze data in any environment.

**Messaging applications** 22  
Integrate collaborative environments based on directories, e-mail and group calendaring.

**Organizational productivity, portals and collaboration** 23  
Enable instant messaging, Web conferencing, collaborative portals and roles-based environments.

**Security management** 25  
Protect confidentiality, integrity and privacy of information systems.

**Software development** 27  
Support processes for designing, constructing and deploying applications.

**Storage management** 32  
Maximize the accessibility, availability and performance of stored information.

**Systems management** 35  
Monitor, control and optimize computing resources.

**Wireless—voice—pervasive** 38  
Supports data exchange and voice interaction between wireless and mobile devices.

**Product index and supported operating systems** 40  
Quickly find the products you need—and that are right for your environment.

For more information:  
**ibm.com/software/catalog/grow**

Prices shown are the suggested retail price and include 12 months of software maintenance. Additional savings on volume purchases and trade up options may apply. Published October 2006. Prices current as of publication date and subject to change.

To order, call **877.426.7249** or visit **ibm.com/software/catalog/fall2006**

IBM Express Middleware 7

*“Workplace Services Express is one of those projects that continues to pay for itself as we add new applications and enhancements across the organization. We are undergoing a major initiative to become an On Demand Business, and this is one of the tools that will allow us to get there.”*

Vince Haman,  
Chief Information Officer,  
MSI Systems Integrators

## IBM Workplace™ Services Express

A team collaboration solution with an integrated portal and built-in business instant messaging that makes it simple to get teams and projects up and running. Runs on a single server, is quick to install and provides easy-to-use and easy-to-customize team spaces with templates and list portlets to create, edit and share documents and information.

D55YBLL .....	\$399 per value unit
D54QALL .....	\$2,280 per 20 users

## **NEW!** IBM Workplace Forms Express

Easily creates interactive Web forms without Web programming skills. Creates open standards-based electronic forms that help reduce paper costs, collects accurate data at the point of capture, improves workflow and extends existing IT investments. One-time purchase only. Not available for clients who previously purchased IBM Workplace Forms 2.5 or 2.6.

### Workplace Forms Server Express

D59GRLL .....	\$100 per value unit (maximum of 200 value units deployed to a single physical server)
---------------	--

### Workplace Forms Viewer Express

D59APLL .....	\$99 per user (1,000 maximum)
D59AVLL .....	\$25,000 (25 pages pack/maximum of 2 packs or 50 pages)

### Complementary product: Workplace Forms Designer

D56EFLL .....	\$649 per user
---------------	----------------

## IBM WebSphere Portal - Express

Allows for easy deployment of sophisticated portal solutions that support employees, trading partners and customers. Each user can customize content, applications, portal page organization and graphical appearance. Adds collaboration features that help teams work together effectively on projects.

D55RSLL .....	\$333 per value unit
D529GLL .....	\$1,700 per 20 registered users

### WebSphere Portal - Express Plus

D55QILL .....	\$530.80 per value unit
D529JLL .....	\$2,700 per 20 registered users

## IBM WebSphere Application Server - Express

Creates, tests, deploys and manages dynamic Web sites, applications and Web services. Wizards, samples and application templates simplify building applications.

D520ELL .....	\$2,000 per CPU
D522LLL .....	\$500 per 20 intranet users
D522PLL .....	\$400 per developer

## IBM WebSphere Business Integration Server Express

Quickly and easily integrates applications to better serve customers, partners and suppliers. Express includes adapters, collaborations, simplified tooling and necessary prerequisites. Express Plus includes additional adapters, additional tooling and optional add-on adapters and collaborations.

D582ILL .....	\$59.99 per value unit
Plus	
D582PLL .....	\$199.99 per value unit
Plus Adapter Capacity Pack	
D53QJLL .....	\$14,999 per application instance
Plus Collaboration Pack	
D53QLLL .....	\$14,999 per application instance

## IBM WebSphere Partner Gateway - Express

Lightweight, easy-to-use, cost-effective B2B connectivity tool.

D582ZLL .....	\$62.50 per value unit
D5555LL .....	\$625 per partner connection

## IBM Tivoli Monitoring Express

Automates the monitoring of essential system resources to detect bottlenecks and potential problems and automatically recover from critical situations.

D57FZLL .....	\$795 per server, four processors per server and maximum up to 100-server environment
---------------	--

## IBM Tivoli Provisioning Manager Express for Inventory

Inventory management solution that collects, stores and maintains hardware and software information, and delivers customizable reports using a standard, Web-based interface.

D57L8LL .....	\$20 per client device
D57L4LL .....	\$1,500 per server

## IBM Tivoli Provisioning Manager Express for Software Distribution

Software distribution solution containing all the capabilities included in Tivoli Provisioning Manager Express for Inventory, plus the ability to quickly distribute software and security patch updates.

D57MMLL.....	\$30 per client device
D57MHLL.....	\$3,500 per server

## IBM Tivoli Storage Manager Express

Provides quick, reliable and easy backup and recovery. Fast backup to disk means minimized backup window and network bandwidth. Easy install and configuration enables a first full backup in less than 30 minutes. Also works as agent for Microsoft Exchange and SQL.

D57I1LL.....	\$195 per processor
Microsoft SQL	
D57HWLL.....	\$400
Microsoft Exchange	
D57HZLL.....	\$400

## IBM Tivoli Identity Manager Express

Effectively manages the integration, security and compliance of your on demand business infrastructure. This simple and security-rich identity management solution provides essential password management, user provisioning and access rights auditing capabilities.

D5742LL.....	\$24 per user
--------------	---------------

## IBM Tivoli Directory Integrator Express

Synchronizes identity data in real time across the enterprise to their authoritative sources without needing a proprietary, centralized data store. Captures changes to critical data, and updates directory and application identity repositories to verify that information used in security, portal management and other services is accurate, authoritative and up to date.

D54Q4LL.....	\$16 per value unit
--------------	---------------------

## IBM WebSphere Commerce - Express

A complete end-to-end solution providing the core capabilities that growing midsize businesses need to create or expand their B2B or B2C e-commerce site with a minimum investment.

D582ULL.....	\$200 per value unit
Developer Edition	
D53WVLL.....	\$3,500 per user

## IBM Express Runtime

An integrated infrastructure offering that integrates the core server components of IBM WebSphere Application Server - Express, IBM DB2 Universal Database™ Express, IBM HTTP Server and a common admin console. These components are provided in one preintegrated and configured package.

D55SHLL.....	\$49.50 per value unit
D54VRLL.....	\$185 per user (minimum 5 users)

## IBM Express Runtime Plus

Provides a growth path from IBM Express Runtime, with limits increased up to four processors.

D55SFLL.....	\$104.99 per value unit
D54VPLL.....	\$401 per user (minimum 5 users)

No sooner did you roll out the new Web service to your customers than you got a call from Someone in Product Marketing (face obscured to protect the guilty) — not only is that application outdated, but you need another one with more bells and whistles, by end of quarter. Sure would be nice if you could leverage the application you just built. Ring a bell?

We've got this pain under control. Check out the products on this page.

## Application servers

*“The performance of the new release of WebSphere Application Server, combined with the strength of the WebSphere product line, made for an easy decision to choose the WebSphere architecture and implement that over time for our entire customer base.”*

**Chance Veasey,**  
Vice President of Operations,  
netASPx

### IBM WebSphere Application Server

An industry-leading J2EE™ and Web services application server that builds, deploys and manages on demand business applications. Fully J2EE 1.4 certified, it delivers a high-performance and extremely scalable transaction engine for dynamic business applications.

D55W8LL.....\$40 per value unit  
Developers  
D51JXLL .....\$750 per developer

### IBM WebSphere Application Server Network Deployment

Expands on WebSphere Application Server to provide advanced Web services features and extended deployment services such as clustering and high availability. Provides a robust, security-rich infrastructure to help ensure 24x7 availability of business-critical Java applications.

D55WJLL .....\$150 per value unit

### IBM WebSphere Application Server Community Edition

A lightweight J2EE application server built on Apache Geronimo. Harnesses the latest innovations from the open source community, and provides a readily accessible, flexible foundation for building and deploying Java applications. Download code from IBM at no charge. IBM offers technical support as an annual subscription, priced per server.

**Entry Level Support**  
D56T8LL .....\$900  
**Enhanced Level Support**  
D56T9LL.....\$3,250  
**Elite Level Support**  
D56T7LL.....\$6,000

### IBM WebSphere Extended Deployment

Extends the capabilities of WebSphere Application Server Network Deployment to deliver a dynamically scalable, high-performance environment with extended manageability for distributed WebSphere applications. Supports on demand scaling, simplifies operation management and improves quality of service for applications running very high transaction volumes.

D56LRLL.....\$150 per value unit

### IBM Lotus Domino

World-class collaboration capabilities that can be deployed as a core e-mail and enterprise scheduling infrastructure, a custom application platform or both. Three products are available.

- IBM Lotus Domino Messaging Server (see description on page 22).
- IBM Lotus Domino Enterprise Server provides all the features of Lotus Domino Messaging Server plus a robust platform for deploying collaborative applications on a wide variety of operating systems.
- IBM Lotus Domino Utility Server provides virtually unlimited access to collaborative applications — not individual mail files.

Companies can choose to provide access to their Lotus Domino applications through a Web browser or through a separately acquired Lotus Notes client.

**Enterprise Server**  
D55JDLL.....\$37.05 per value unit  
**Utility Server**  
D55MRL .....\$199.95 per value unit

### IBM Lotus Domino Express

See description, part numbers and pricing on page 7.

For more information:  
[ibm.com/software/catalog/appservers](http://ibm.com/software/catalog/appservers)

*Prices shown are the suggested retail price and include 12 months of software maintenance. Additional savings on volume purchases and trade up options may apply. Published October 2006. Prices current as of publication date and subject to change.*

The new acquisition was just announced. Good news for shareholders: your business is expanding. Bad news for IT: you've got to bring all the applications together and centralize management. Otherwise, Operations staff (that's Mrs. Operations on the right) will waste valuable resources trying to coordinate information and management activities manually.

If your pain is no integration in applications, look no further.

## Business integration

### Application connectivity

**NEW!** **IBM Workplace for SAP Software**  
Enhances the value of your SAP investments by expanding collaborative and process interactions across SAP applications and integrating SAP and non-SAP applications. Collaborative capabilities include instant messaging, team spaces, presence awareness, performance management, dashboards, scorecards, alerts, e-forms, workflow, and document and content management — plus prebuilt integration accelerators. Provides browser access.  
**D58HMLL.....\$399 per user (minimum 400 users)**

**IBM WebSphere MQ**  
Delivers reliable integration for applications and Web services, allowing existing software and hardware investments to be fully leveraged across more than 80 platform configurations. Provides an award-winning messaging backbone as a proven transport for Enterprise Service Bus (ESB). Supports JMS, SSL, SOAP, Eclipse and IPV6.  
**D55V1LL.....\$64.10 per value unit**

**IBM WebSphere MQ Extended Security Edition**  
This enhanced edition of WebSphere MQ provides a multiplatform security management solution with end-to-end, application-level data protection features. Enables enterprise-wide, remote management of security policies on the MQ network and can be deployed to existing production environments without changes to existing WebSphere MQ applications.  
**D55Q2LL .....\$80 per value unit**

**IBM WebSphere MQ Everyplace**  
Extends business integration to mobile devices using security-rich and dependable application messaging. Connects seamlessly to many WebSphere offerings by providing a mobile transport layer that can operate over semi-connected wireless and wired networks.  
**Network Edition for integrating mobile and wireless devices with the enterprise**  
**D55MILL.....\$55.74 per value unit**  
**Retail Edition for integrating retail store controllers and point of sale with head-office systems**  
**D55MKLL.....\$41.90 per 10 value units**

**IBM WebSphere Enterprise Service Bus**  
Provides Web services connectivity, Java Messaging Service (JMS) and service oriented integration, allowing customers to quickly and easily build and deploy interactions between applications.  
**D58AELL .....\$250 per value unit**

**IBM WebSphere Message Broker**  
Delivers an advanced Enterprise Service Bus to provide connectivity and universal data transformation for both standard and nonstandards-based applications and services to power your service oriented architecture. Provides a further level of intermediation between applications using different message structures and formats including XML, COBOL, C, EDI, SWIFT and other standards. Supports any-to-any transformation, database integration and Web services.  
**D56P3LL .....\$850 per value unit**

*“Our biggest integration challenges continue to be in the areas of scalability and reliability. We were confident that IBM WebSphere MQ Workflow was an appropriate product to connect our 1,000-plus Canadian branches and processing centers.”*

**Sue Harrison,**  
Senior Vice President,  
Retail Systems Development,  
Scotiabank

## IBM WebSphere Transformation Extender for Message Broker

Extends the range of message formats and protocols that Message Broker can handle, including very large, complex semistructured data sets. Offers wide support for industry standards with predefined industry PACKs.

**D581DLL .....\$200 per value unit**

## IBM WebSphere Transformation Extender

See description, part numbers and pricing on page 14.

## IBM WebSphere Adapters

Plug into your business applications and data sources to reveal information held inside, how it is structured and what can be done with it. Control information flow in and out of applications without changing the application. Prepackaged products help integrate legacy and packaged applications, technologies and mainframe systems, addressing industry-specific and cross-industry needs.

### SAP

**D555XLL .....\$24,000 per application instance**

### PeopleSoft

**D555ZLL .....\$24,000 per application instance**

### JDBC

**D555PLL .....\$16,000 per application instance**

### Flat Files

**D555TLL .....\$16,000 per application instance**

## IBM Lotus Enterprise Integrator® for Domino

Provides high-performance, scalable exchange of data between Lotus Domino and native access to host and relational data systems. Set up, manage and schedule batch and real-time access to IBM DB2 Universal Database™, Oracle, Sybase and more with point-and-click ease.

**D55N3LL .....\$113.36 per value unit**

## IBM Lotus Connector for SAP Solutions

Facilitates scheduled or real-time access to SAP enterprise software from a Lotus Domino server. This set of tools allows you to integrate SAP solution workflow into Lotus Domino applications.

**D55J7LL .....\$173.14 per value unit**

## Process integration

### IBM WebSphere MQ Workflow

Facilitates rapid process deployment to people, applications and Web services, based on the WebSphere software platform and WebSphere MQ. Scalable, fault-tolerant and optimized for parallel distributed processing in a service oriented architecture.

**D55UVLL .....\$858.53 per value unit**

### IBM WebSphere Process Server

Next-generation process server for integrating and automating business processes using enterprise services based on a service oriented architecture.

**D572ZLL .....\$850 per value unit**

### IBM WebSphere Integration Developer

New Eclipse 3.0–based tool to assemble business processes with minimal programming skills.

**D5571LL .....\$3,500 per authorized user**

### IBM WebSphere Partner Gateway Advanced Edition

Provides a consolidated B2B gateway for partner community integration, capable of serving multiple B2B protocols and standards. Ensures consistent security and service levels apply to all external partner connections.

**D564XLL .....\$350 per value unit**

**D56EULL .....\$350 per subcap value unit**

**D5557LL .....\$2,000 per partner connection**

### IBM WebSphere Partner Gateway Enterprise Edition

Provides a consolidated B2B gateway for partner community integration, capable of serving multiple B2B protocols and standards. Ensures consistent security and service levels apply to all external partner connections. Licensed to an unlimited number of partner connections.

**D5650LL .....\$1,875 per value unit**

**D56DMLL .....\$1,875 per subcap value unit**

## IBM WebSphere Business Modeler

Fully visualize, comprehend and document business processes. Rapid results can be obtained through the collaboration functionality, where a subject-matter experts team clearly defines business processes and models, then deploys, monitors and takes actions based on KPIs, alerts and triggers for continuous optimization. Business processes then get tightly linked with strategic corporate objectives and honed as required.

<b>Basic</b>	
D53V3LL .....	\$1,250 per user
<b>Advanced Edition</b>	
D53V1LL .....	\$9,950 per user
<b>Publishing Server</b>	
D56LALL .....	\$526.45 per value unit

## IBM WebSphere Business Monitor

Displays real-time information from a variety of environments to enable decisive business innovation and optimization. The monitor feeds this data back into process modeling tools, with alerts and notifications to key users, to deliver continuous business process improvements. Allows the monitoring of nonprocess data by retrieving information from external databases. Tightly integrates with both WebSphere Business Modeler and WebSphere Process Server—providing support for the Common Event Infrastructure by leveraging the Common Base Event (CBE) format.

D56KQLL .....	\$858.55 per value unit
---------------	-------------------------

## IBM WebSphere Business Integration Workbench

An easy-to-use process modeling tool that allows testing, analyzing, simulating and validating of business processes and software models. Offers a full range of business process models, from the creation of process flow diagrams to the validation of process.

D527TLL .....	\$6,970 per user
---------------	------------------

## IBM WebSphere Host Access Transformation Services

Provides all the tools needed to quickly and easily extend host applications to business partners, customers and employees. Makes 3270 and 5250 applications available as HTML through the most popular Web browsers, while converting host screens to a Web look and feel.

D58BDLL .....	\$1,250 per value unit
---------------	------------------------

## IBM WebFacing Deployment Tool with HATS Technology

A single product that offers the advantages of both IBM WebFacing Tool and HATS. Makes 5250 applications available as HTML through a browser, or in a portlet, while converting host screens to a Web look and feel. Helps improve the workflow and navigation of host applications.

D575TLL .....	\$120 per authorized user
---------------	---------------------------

## IBM Host Access Client Package for Multiplatforms

Allows managed migration of Web-to-host technologies at a customized pace. At one price per user, provides access to legacy applications for all types of users regardless of their needs. This package includes IBM Personal Communications for traditional emulation and IBM WebSphere Host On-Demand for browser-based emulation.

D5BGCLL .....	\$231 per registered user
---------------	---------------------------

## IBM CICS® Transaction Gateway

A J2EE connector to CICS applications that supports the J2EE Connector Architecture (JCA) 1.5 specification. Enables CICS applications to be used in comprehensive and sophisticated J2EE and Web services solutions that are hosted on powerful application servers, such as WebSphere Application Server.

D55KZLL .....	\$99.65 per value unit

Not a day goes by that Someone (recognize this character on the right?) doesn't say, "We have got to tighten up order fulfillment." Or, "Have you figured out how to process more transactions during the holidays yet?" Or our favorite: "Our competitors offer a better shopping experience. Why can't we?"

If you need a better way to manage e-commerce, look over the software on this page.

**SOLUTION #22**

## Commerce

### IBM WebSphere Commerce Enterprise

Provides a powerful, flexible infrastructure based on a unified platform for running large, high-volume B2B and advanced B2C e-commerce Web sites for a global on demand business. Supports customer-specific pricing, terms and entitlements that involve individuals with varying levels of authority.

**D55WVLL.....\$1,548.37 per value unit**

### IBM WebSphere Commerce Developer Business Edition

Provides a corresponding development environment for WebSphere Commerce Enterprise.

**D53VGLL.....\$30,967 per user**

### IBM WebSphere Commerce Professional

Increases site functionality for B2C and multichannel retailers by personalizing customer buying experiences, streamlining order processes, reducing cycle times, optimizing operational efficiencies and accommodating high transaction volumes. Provides infrastructure to support and integrate multiple sales channels, including Web, kiosk, POS, buy online and pickup in store, and more.

**D55WOLL .....\$990.96 per value unit**

### IBM WebSphere Commerce - Express

Let us guess. It's starting to look like you'll never get your arms around the query game. Just when you think you've got the Beast slain, Accounting (see mugshot, left) calls again with yet another report they need for Sarbanes-Oxley. It's like Someone's playing a cruel, wicked joke on the IT team. Sound familiar?

Read on to learn more about IBM solutions for ways to control the Evil Database Monster.

## Information management

*“With the pureXML support available in IBM DB2 9, it is far easier, faster and less expensive to run queries, share and retrieve data, and make document changes in response to new business requirements without impacting applications.”*

Thore Thomassen,  
Senior Enterprise Architect,  
Storebrand Group

### Data servers

#### **NEW!** IBM DB2 9 (formerly codenamed viper)

Offers leading-edge XML technology that removes traditional boundaries of relational databases. The industry's only hybrid data server that serves both relational and pureXML data, allowing customers to significantly reduce the complexity and time spent creating information-rich applications. Unique optimization for powering SAP faster, an optional data compression feature that slashes storage requirements and total IT cost, and label-based access control — a fine-grain security feature that gives customers the flexibility to support their unique security and privacy requirements.

Call for information

#### **NEW!** IBM DB2 Workgroup 9

The ideal data server for deployment in a departmental, workgroup or midsize business environment. Suitable for transaction processing or complex query workloads on servers with up to four processors.

D51NDLL ..... \$10,000 per CPU  
D5B77LL ..... \$350 per authorized user  
D55TWLL ..... \$100 per value unit

#### Value-added features for DB2 Workgroup 9:

**pureXML** — Optimizes storage of XML data to reduce costs and complexity.

D58UJLL ..... \$175 per authorized user  
D593TLL ..... \$50 per value unit

**High Availability** — Maximizes data availability.

D58NQLL ..... \$175 per authorized user  
D5903LL ..... \$50 per value unit

**Workload Management** — Allocates resources effectively for better performance.

D58CWLL ..... \$175 per authorized user  
D59GDLL ..... \$50 per value unit

**Performance Optimization** — Improves performance of complex query or OLAP workloads.

D589PLL ..... \$175 per authorized user  
D592NLL ..... \$50 per value unit

#### **NEW!** IBM DB2 Enterprise 9

The ideal data server for the most demanding workloads. Easily scales to handle high-volume transaction processing, multiterabyte data warehouses and mission-critical applications from vendors such as SAP.

D518GLL ..... \$36,400 per CPU  
D56CILL ..... \$938 per authorized user  
D55IULL ..... \$364 per value unit

#### Value-added features for DB2 Enterprise 9:

**pureXML** — Optimizes storage of XML data to reduce costs and complexity.

D58V3LL ..... \$350 per authorized user  
D593ILL ..... \$137.50 per value unit

**Storage Optimization** — Reduces cost of storing data and improves system efficiency.

D59GFLL ..... \$137.50 per value unit

**Advanced Access Control** — Minimizes risk of unauthorized access.

D58N3LL ..... \$263 per authorized user  
D590ZLL ..... \$100 per value unit

**Performance Optimization** — Provides proactive management of system performance.

D5874LL ..... \$350 per authorized user  
D5907LL ..... \$137.50 per value unit

**Database Partitioning** — Improves scale and manageability of large databases.

D55IYLL ..... \$100 per value unit

**Geodetic Data Management** — Offers geographical location analysis.

D585VLL ..... \$263 per authorized user  
D55LVLL ..... \$100 per value unit

## IBM DB2 Express 9

See description, part numbers and pricing on page 7.

### Standalone DB2

## IBM DB2 Personal 9

Provides a single-user database engine ideal for deployment to PC-based users. Can be remotely managed, allowing for deployment in occasionally connected or remote office implementations that don't require a multiuser capability.

D5B69LL.....\$461 per install

## IBM Informix Dynamic Server Enterprise Edition

Provides online transaction processing (OLTP) performance, reliability and nearly hands-free administration. Version 10 offers significant improvements in performance, availability, security and manageability over previous versions, including patent-pending technology that virtually eliminates downtime and automates many tasks associated with deploying mission-critical enterprise systems.

D5282LL.....\$2,065 per concurrent session

Unlimited

D55QQL.....\$500 per value unit

## IBM Informix Dynamic Server Workgroup Edition

OLTP database for midsize business or enterprise departmental solutions. Provides OLTP performance, legendary reliability and nearly hands-free administration.

D55NRLL.....\$100 per value unit

D6DBDLL.....\$438 per concurrent session

D6DB5LL.....\$781 per server install

## IBM Informix Dynamic Server HDR for Workgroup Edition

Offers a continuous high-availability solution that protects your data from both planned and unplanned outages. This complete turnkey disaster recovery solution offers lower TCO, better performance, greater scalability and increased availability over leading competitive technologies.

D55QZLL.....\$75 per value unit

## IBM Informix Dynamic Server Express Edition

See description, part numbers and pricing on page 7.

## IBM DB2 Everyplace Enterprise Edition 9

See description, part number and pricing on page 38.

## IBM DB2 Connect™

### IBM DB2 Connect Personal Edition 9

Licensed for use by one user on a single workstation, allowing connection to mainframe and minicomputer database servers.

D58FELL.....\$461 per client

### IBM DB2 Connect Enterprise Edition 9

Available with the standard server/user model licensing option.

D58FGLL.....\$9,875 (25 concurrent users)

D58FILL.....\$2,375 (25 authorized users)

### IBM DB2 Connect Application Server Edition 9

License charges are based on the number of processors used by the Web or application servers connecting to DB2 Connect.

D55NILL.....\$198.50 per value unit

## Data warehousing and analytics

### IBM DB2 Data Warehouse Base Edition

Delivers a market-leading data warehouse platform, providing enterprise-level scalability and performance.

D57U9LL.....\$368.75 per value unit

### IBM DB2 Data Warehouse Enterprise Edition

Increases the value of your information with a high-performing data warehouse coupled with mining and analytics features that deliver real-time, contextual insight into your data and enable faster, better decision making. Features include enhanced warehouse management, analytic application development, OLAP, data mining and VLDB query/resource management.

D57UBLL.....\$750 per value unit

### IBM DB2 Alphablox

Drives greater business value from information by delivering that information across your organization to the people who need it — at the right time and within the context of their daily activities. Easy to use, easy to deploy, it requires no end-user training and is built on a platform of open standards-based components that significantly decrease the time needed to design, develop and embed advanced analytics into your business processes.

D55HYLL.....\$450 per value unit

Systems Administrator, Information  
and Communications Department,  
OZ

## Database tools

### IBM DB2 Performance Expert for Multiplatforms

Helps database administrators simplify database performance management and tuning.

D55KALL .....\$100 per value unit

### IBM DB2 High Performance Unload for Multiplatforms

High-speed tool for unloading, extracting and repartitioning data from DB2 databases.

D55JYLL .....\$50 per value unit

### IBM DB2 Recovery Expert for Multiplatforms

Provides powerful diagnosis, reporting and automated recovery capabilities to maintain accurate data and high availability.

D55NELL .....\$120 per value unit

### IBM DB2 Test Database Generator for Multiplatforms

Creates subsets of DB2 production data while masking out any sensitive or confidential data.

D55TQLL .....\$62.50 per value unit

### IBM DB2 Data Archive Expert for Multiplatforms

Autonomic tool that offers a fast, flexible and efficient way to archive and retrieve DB2 data objects.

D570TLL .....\$62.50 per value unit

### IBM DB2 Web Query Tool for Multiplatforms

Connects Web-based users directly to multiple enterprise databases. Builds, shares and runs queries and converts query results to XML and other highly transportable file formats.

D55NCLL .....\$43.35 per value unit

### IBM DB2 Table Editor for Multiplatforms

Updates, creates and deletes data across multiple DB2 database platforms, including the Informix Dynamic Server, with security, referential integrity and support for the advanced capabilities of DB2. Accessible to both Windows and Java-based users.

D55JWLL .....\$43.35 per value unit

## IBM DB2 Toolkit for Multiplatforms

With the purchase of one license, the toolkit offers the following DB2 Multiplatform Tools — at a significant cost savings:

- IBM DB2 Data Archive Expert for Multiplatforms
- IBM DB2 High Performance Unload for Multiplatforms
- IBM DB2 Performance Expert for Multiplatforms
- IBM DB2 Recovery Expert for Multiplatforms
- IBM DB2 Test Database Generator

D57UKLL .....\$295 per value unit

## Content management and discovery

### IBM DB2 Content Manager Standard Edition

An entry-level content management solution for small and medium-size businesses that provides a single, open, comprehensive and consistent framework to manage, share, reuse and archive all types of digitized content.

D56SELL .....\$345 per user, initial order quantity of 20

### IBM DB2 Content Manager Enterprise Edition

Provides a comprehensive platform for managing critical business information, including documents and images, archived e-mail, XML and multimedia content. With integrated document routing and life-cycle management, it also includes IBM's leading content integration technology designed to integrate business content with existing corporate applications.

D54TNLL .....\$695 per user, initial order quantity of 20

### IBM DB2 Content Manager OnDemand

Stores and manages high-volume computer output capture, electronic report management and statement presentment. Supports call center productivity and customer self-service with instant access to bills, invoices and statements. Data stored in DB2 Content Manager OnDemand can be managed as records, consistent with other corporate information.

D54TJLL .....\$495 per user, initial order quantity of 20

### IBM DB2 Document Manager

Provides a security-rich and robust platform to manage the complete life cycle of business documents, including compound documents, renditions and official business records.

D54QPLL .....\$625 per user, initial order quantity of 20

## IBM DB2 Records Manager

Scalable, Web-based infrastructure tool that applies structured retention, legal hold and disposition rules to company records, whether they are digital or traditional paper-based documents. Helps reduce evidence-discovery costs and demonstrate compliance with regulations.

**D54T1LL .....\$40 per user, initial order quantity of 100**

## IBM DB2 CommonStore for Exchange Server and IBM DB2 CommonStore for Lotus Domino

Provide e-mail archival and retention solutions to help comply with e-mail message retention requirements and gain operational efficiency. Manage unstructured content types, including content from Windows file servers and Microsoft SharePoint® Portal, to integrate images, documents, printouts and more for policy-driven archive. Built-in integration with DB2 Records Manager to help meet corporate governance, industry regulation initiatives or both.

### Exchange

**D54T9LL .....\$50 per user, initial order quantity of 100**

### Lotus Domino

**D54TBLL .....\$50 per user, initial order quantity of 100**

## **NEW!** IBM eMail Search for CommonStore for Lotus Domino

Provides a cross-mailbox search and discovery tool to search across personal mailboxes. Features advanced search and search refinement, case folder, hold management and audit trail exception reporting. eMail Search is a Web-based application layer on top of Content Manager that works on e-mail stored in Content Manager by CommonStore from Lotus Domino.

**D59HQLL .....\$11.25 per user, initial order quantity of 100**

## **NEW!** IBM eMail Search for CommonStore for Microsoft Exchange Server

Provides a cross-mailbox search and discovery tool to search across personal mailboxes. Features advanced search and search refinement, case folder, hold management and audit trail exception reporting. eMail Search is a Web-based application layer on top of Content Manager that works on e-mail stored in Content Manager by CommonStore from Microsoft Exchange.

**D59HPLL .....\$11.25 per user, initial order quantity of 100**

## IBM DB2 CommonStore for SAP

Enables SAP customers to manage the growth of SAP application data through periodic archiving to improve and control overall system performance. Helps improve business processes, reduce storage costs and improve SAP system performance.

**D54T7LL .....\$345 per user, initial order quantity of 20**

## IBM OmniFind Discovery Edition

With its unique ability to understand user intent and application context, it helps quickly deploy business solutions that increase sales, reduce support costs, improve productivity and provide insight to help you make better decisions.

**D576ALL .....\$75,000 per CPU**

### Connector

**D576ELL .....\$12,000 per content source connection**

## IBM Commerce Module for OmniFind Discovery Edition

Helps online retail and catalog companies convert shoppers into buyers by making it easy for people to find the products and services that best match their specific needs.

**D576CLL .....\$18,000 per CPU**

## IBM Self-Service Module for OmniFind Discovery Edition

Helps organizations increase portal adoption and reduce customer service costs by empowering customers, partners and employees to easily tap disparate information available across intranets, extranets and corporate portals.

**D576JLL .....\$18,000 per CPU**

## IBM Contact Center Module for OmniFind Discovery Edition

Delivers contextually relevant information located across an organization to efficiently resolve support inquiries without escalation, increase online resolution rates, improve customer satisfaction and enhance agent productivity.

**D5774LL .....\$36,000 per CPU**

## IBM Case Resolution Module for OmniFind Discovery Edition

Intercepts online service requests and immediately responds to people with accurate answers, which may prevent the need to escalate to the contact center, thus reducing operating costs.

**D5776LL .....\$18,000 per CPU**

*“The IBM OmniFind Discovery Edition solution provided an immediate and rapid return on our investment. In just six months, we exceeded our total Internet sales from the previous year.”*

Alisa Keimel,  
Marketing and  
Public Relations Manager,  
Johnny’s Selected Seeds

**IBM Classification Module for OmniFind Discovery Edition**

Automatically classifies long-form requests such as e-mails, case management notes and discussion group comments.  
D57DXLL .....\$75,000 per CPU

**IBM Ad Hoc Reporting Module for OmniFind Discovery Edition**

Optional embedded business intelligence engine that allows users to perform advanced analytical operations with the report data.  
D576HLL .....\$4,000 per user

**IBM OmniFind Discovery Integration for Siebel**

Enables users to leverage search capabilities from within Siebel applications. Includes a Siebel connector and a set of screens that appears within the Siebel application user interface.  
D57C3LL .....\$18,000 per CPU

**NEW! IBM OmniFind Enterprise Starter Edition**

Enables secure intranet search across Lotus Domino databases, file shares, Web and intranet pages, and content management systems. Designed for smaller scale implementations (two-processor limit).  
D59G3LL .....\$375 per value unit  
Connector  
D594WLL .....\$18,750 per data source

**IBM OmniFind Enterprise Edition**

Enables secure intranet search across Lotus Domino databases, file shares, Web and intranet pages, and content management systems.  
D5720LL .....\$562.50 per value unit  
Connector  
D54U2LL .....\$18,750 per data source

**IBM WebSphere Information Integrator Content Edition**

Allows real-time, federated access to content scattered across disparate content management and workflow systems.  
D55NYLL .....\$750 per value unit  
Connector  
D54U2LL .....\$18,750 per data source

**NEW! IBM WebSphere Information Integrator Content Starter Edition**

Allows real-time federated access to content scattered across disparate content management and workflow systems. Designed for departmental-scale implementations (two-processor limit, includes two connector entitlements).  
D594YLL .....\$52,500 per processor  
Connector  
D5956LL .....\$18,750 per data source

*Information integration*

**NEW! IBM Information Server**

New software platform helps organizations derive more value from the complex, heterogeneous information spread across their systems. Integrate disparate data and deliver trusted information wherever and whenever needed, in line and in context, to specific people, applications and processes. Collaborate to understand the meaning, structure and content of information across sources. Provides breakthrough productivity and performance for cleansing, transforming and moving this information consistently and securely throughout the enterprise, so it can be accessed and used in new ways to drive innovation, increase operational efficiency and lower risk. Achieves new levels of information integration speed and flexibility by:

- Delivering trusted information and governing its usage.
- Providing a comprehensive, unified foundation for enterprise information architectures.
- Supplying consistent, reusable information within service oriented architectures (SOAs).

**IBM Information Server product modules:**

**IBM WebSphere Information Analyzer**

Profiles and establishes an understanding of source systems, and monitors data rules on an ongoing basis to eliminate the risk of proliferating “bad” data.  
D59A0LL .....\$100,000 per two base processors  
D59A4LL .....\$25,000 per additional processor

## IBM WebSphere QualityStage

Standardizes and matches information across heterogeneous sources.

D59B3LL .....\$200,000 per four base processors  
D59AELL .....\$25,000 per additional processor

## IBM WebSphere DataStage®

Extracts, transforms and loads data between multiple sources and targets.

D599HLL .....\$250,000 per four base processors  
D598RLL .....\$31,250 per additional processor

## IBM WebSphere Federation Server

Defines integrated views across diverse and distributed information sources, including cost-based query optimization and integrated caching.

D591VLL .....\$125,000 per two base processors  
D591QLL .....\$31,250 per additional processor

## IBM WebSphere Information Services Director

Allows information access and integration processes to be published as reusable services in a service oriented architecture.

D59AKLL .....\$75,000 per two base processors  
D59AMLL .....\$18,750 per additional processor

## IBM WebSphere Metadata Server

Provides unified management, analysis and interchange of metadata through a shared repository and services infrastructure.

Call for information

## IBM WebSphere Business Glossary

Creates, manages and searches metadata definitions.

Call for information

## IBM WebSphere Replication Server

Provides high-speed event-based replication between databases for high availability and disaster recovery, data synchronization and data distribution.

D591LLL .....\$137.50 per value unit

## IBM WebSphere Data Event Publisher

Detects and responds to data changes in source systems, publishing changes to subscribed systems or feeding changed data into other modules for event-based processing.

D591NLL .....\$62.50 per value unit

## Other information management

### **NEW!** IBM Workplace Web Content Management

Makes it easy for many levels of users to manage comprehensive Web content creation, life cycle, personalization and publishing for dynamic intranet, extranet and Internet sites. Also available in Standard Edition for organizations and departments with less than 1,000 users.

D55Y4LL .....\$399.99 per value unit  
Standard Edition  
D55Y6LL .....\$99.99 per value unit/  
20 publishers and four CPU maximum

### IBM Lotus Domino Document Manager

Makes it easy for many levels of users to securely capture, store, manage and provide access to collaborative business documents. Helps manage the complete life cycle of office documents — from collaborative authoring to review, approval and archival.

D53KXLL .....\$99 per user

### **NEW!** IBM Workplace for Business Controls and Reporting

Provides a Web-based foundation for monitoring business controls in response to Section 404 of the Sarbanes-Oxley Act or other control initiatives, such as CoBIT. Can help companies gather and monitor information about controls in a consistent manner.

D53ZILL .....\$28,750 per user

### IBM Workplace for Business Strategy Execution

Helps organizations improve the management and execution of their business objectives, be more responsive to change and align actions to strategy. Helps communicate strategy and metrics consistently throughout the organization and assigns accountability to meeting objectives.

D571LLL .....\$950 per value unit

Prices shown are the suggested retail price and include 12 months of software maintenance. Additional savings on volume purchases and trade up options may apply. Published October 2006. Prices current as of publication date and subject to change.

Let's face it: it would be nice if you'd started out with one e-mail application. One that works with the calendar. Talks to the schedule. And to the address books. Oh, and databases, too. But instead, you've got six applications. And six people to manage them. And that's about five too many managers (there's One Too Many on the left). Time to consolidate?

If you're suffering collaboration roadblocks, you've come to the right place.

## Messaging applications

*“From within the Notes environment, we can use the templates to develop new applications for Municipality Prostejov very rapidly without the need for additional software. This keeps both the development and the total costs of ownership low, an important benefit for the municipality. The deciding factor was a demonstration of the applications we had developed in Lotus Notes for other organisations. The municipality IT team realised that they could do much more inside Notes than they had expected.”*

Stanislav Marszalek,  
TCL Digitrade

### Advanced messaging

#### IBM Lotus Domino Messaging Server

Includes integrated messaging and directory services that provide world-class e-mail, calendaring and scheduling, discussion databases and address books in a unified, easy-to-manage architecture. Includes collaboration tools such as discussion databases, basic workflow for documents, presence awareness and interactive, online conversations.

D55J9LL .....\$14.31 per value unit

#### IBM Lotus Domino Enterprise Server

See description, part number and pricing on page 10.

#### IBM Lotus Domino Express

See description, part numbers and pricing on page 7.

#### IBM Lotus Notes

This premier, high-function integrated desktop client for accessing Lotus Domino server combines world-class messaging, calendaring and scheduling capabilities with a powerful platform for collaborative applications. A new feature lets you integrate SAP applications and workflow into the Lotus Notes client at no additional charge.

Messaging  
D5CPILL .....\$101 per user  
Collaboration (messaging and applications)  
D5CS2LL .....\$140 per user

#### IBM Lotus Domino Web Access and Lotus Domino Access for Microsoft Outlook

Client that provides users with access to leading Lotus Domino messaging and collaboration features — delivered through a wide range of Web browsers on Windows, Linux and Macintosh. Includes Lotus Domino Access for Microsoft Outlook for easy migration from Microsoft Exchange to Lotus Domino, allowing users to continue working with familiar Outlook clients.

Messaging  
D5D5ILL .....\$70.40 per user  
Collaboration (messaging and applications)  
D5CGLLL .....\$109 per user

For more information:

Prices shown are the suggested retail price and include 12 months of software maintenance. Additional savings on volume purchases and trade up options may apply. Published October 2006. Prices current as of publication date and subject to change.

Well it finally happened. Someone (see right) threw the hammer down and said you've got to align your operations, your staff, your resources — the whole ball of wax — with the business. "You've got to start treating what you do like it's a service," he said. As if you don't serve everyone already.

We've got just the thing: tools to implement a service oriented architecture (SOA). Read on.

## Organizational productivity, portals and collaboration

### Collaboration services software

#### IBM Workplace Collaboration Services

Simplifies collaboration with a single, integrated environment. Includes a wide range of capabilities — all built on a componentized service oriented architecture (SOA). Easily deploy and centrally manage individually based capabilities to flexibly meet individual user needs or as part of a customized solution.

D55Y9LL .....\$900 per value unit

Individual IBM Workplace collaboration capabilities:

IBM Workplace Messaging  
D529SLL .....\$29 per user

IBM Workplace Collaborative Learning  
D5394LL .....\$35 per user

IBM Workplace Team Collaboration  
D53YGLL .....\$44.50 per user

IBM Workplace Documents  
D53RQLL .....\$29 per user

IBM Workplace Web Content Management  
D55Y4LL .....\$399.99 per value unit

### Real-time and team collaboration

#### IBM Lotus Sametime

Provides a platform for real-time collaboration based on three on demand capabilities — presence awareness, instant messaging and Web conferencing.

D5CT2LL .....\$55 per user

D55Y0LL .....\$318.42 per value unit

#### IBM Lotus Web Conferencing

Delivers all the benefits of Web conferencing while offering the cost savings of an on-premise deployment. With concurrent user pricing, the same license can be used to hold internal and external meetings. Based on Lotus Sametime.

D5D7GLL .....\$475 per concurrent user

#### IBM Lotus QuickPlace

An enterprise-ready, self-service workspace expressly designed for team collaboration. Users can create secure workspaces on the Web, providing a place to collaborate on projects.

D5CSULL .....\$48.66 per user

D55XYLL .....\$127.35 per value unit

### Portals

#### **NEW!** IBM WebSphere Portal Server

Provides core portal services that aggregate applications and content, and delivers them as role-based applications, with robust security, scalability and availability support. Now with an enhanced user experience, development and deployment enhancements, as well as advanced personalization and policy-based administration features.

D59FLLL .....\$500 per value unit

D596TLL .....\$2,500 per 20 registered users

#### IBM WebSphere Portal Enable

Includes all the features of WebSphere Portal Server and provides the advanced portal functionality competitive businesses need, including Web content management, centralized document storage and portal workflow. Now with improved Web content management authoring capabilities and improved document management integration with Microsoft Windows and Microsoft Office clients.

D55UCLL .....\$950 per value unit

**Organizational productivity, portals and collaboration** 23

*“With Lotus Domino Express, QuickPlace and Sametime software, sirius-net was able to design, build and deploy a tailor-made solution at a very effective price point for Nova.”*

Hubertus Amann,  
Chief Executive Officer,  
sirius-net

**IBM WebSphere Portal Extend**

Builds on the features of WebSphere Portal Server and WebSphere Portal Enable with collaboration tools like instant messaging, team workspaces and a people finder portlet to enhance productivity. Now supports electronic forms that simplify form development, delivery and processing, allowing portal users to edit electronic forms as part of a business process.

**D55RELL .....\$1,300 per value unit**

**IBM WebSphere Portal - Express**

See description, part numbers and pricing on page 8.

**IBM WebSphere Portlet Factory**

Supercharges WebSphere Portal with tools and technology to rapidly create, customize, maintain and deploy portlets. The ease of use and advanced development features help streamline the entire portlet development process, enabling developers to deliver adaptive, robust portlets that support a service oriented architecture in a fraction of the time and at a fraction of the cost it requires today.

**D57XYLL .....\$200 per value unit**

**NEW! IBM Workplace Dashboard Framework**

Speeds creation and deployment of standards-based, active dashboards by delivering reusable service oriented components, robust administration tools and features that consolidate data and processes from multiple back-end systems. Facilitates problem resolution right from the dashboard, helping dramatically reduce development costs and speed the time to value for dashboard initiatives. Runs on top of WebSphere Portal.

**D581ILL .....\$330 per value unit**

**NEW! IBM Workplace Dashboards**

Empowers executives with insight into the metrics and key performance indicators (KPIs) that align with their roles and responsibilities, such as EBITDA, Top Opportunities, Headcount, Internal Hires, Time to Fill Positions and Employee Turnover. Provides sales executives with the information they need to effectively manage their sales teams and close deals — best-practice KPIs include Top Opportunities, Rep Performance, Opportunities by Stage and Customer Satisfaction.

**For Executives**

**D581SLL .....\$120 per value unit**

**For Sales**

**D581NLL .....\$120 per value unit**

**IBM Software Solution for On Demand Workplace**

Provides collaboration and portal software in one package, delivering a cost-effective way to combine the collaborative strengths of Workplace Collaboration Services (see page 23) with the integration power of WebSphere Portal Enable (see page 23). Integrate your business applications and processes, send e-mails, take training courses, exchange instant messages, hold spontaneous or planned Web conferences and manage Web content — all from one common interface.

**D556NLL .....\$399 per user**

*Forms management*

**IBM Workplace Forms**

Helps reduce the time, costs and problems inherent to paper-based forms processes. Unleashes information trapped in paper, making it instantly available to anyone, anytime and anywhere — helping speed business transactions and increase responsiveness with intelligent, easy-to-use dynamic forms that reduce or eliminate errors at the point of entry.

**Designer**

**D56EFL .....\$649 per user**

**Server**

**D571HLL .....\$250 per value unit**

**Viewer**

**D56E1LL .....\$188 per user**

**D58HGLL .....\$93,750 (25 pages license)**

**NEW! IBM Workplace Forms Express**

See description, part number and pricing on page 8.

The worst has happened. Somebody (suspect in custody shown here) in your company borrowed a password from a line of business manager. And used it to change some billing data in the system. Which caused a Web server to crash. Which cost about \$237,000 in lost sales. Don't let Somebody have control over your network security.

Products on these pages can help.

## Security management

### IBM Tivoli Access Manager for e-business

Policy-based access control solution for on demand business and enterprise applications. Controls both wired and wireless access to applications and data, and provides single sign-on for authorized users. Integrates with on demand business applications to deliver a security-rich, personalized experience for authorized users.

**D53HVLL** .....\$34.50 per value unit

### IBM Tivoli Access Manager for Business Integration

A multiplatform security management solution for WebSphere MQ (see page 11) that upgrades native security services of WebSphere MQ to those provided by WebSphere MQ Extended Security Edition. Provides application-level data protection for WebSphere MQ-based applications, without needing to modify or recompile them.

**D566ALL**.....\$19.60 per value unit

### IBM Tivoli Access Manager for Operating Systems

A policy-based access control system for UNIX and Linux operating systems. Effectively addresses many system vulnerabilities surrounding UNIX and Linux super-user or root accounts. Provides centralized auditing and reporting, helping customers easily and efficiently comply with regulations and corporate protocols by having a centralized repository for auditing data and preconfigured reports.

**D5668LL**.....\$20 per value unit

### IBM Tivoli Access Manager for Enterprise Single Sign-On

A product suite powered by Passlogix that provides a unified enterprise single sign-on and authentication experience for a user's applications. Helps companies address their compliance needs, enforce security, reduce administrative costs and increase productivity.

**D57HNLL** .....\$59 per value unit

#### Desktop Password Reset Adapter

**D57I4LL** .....\$10 per value unit

#### Provisioning Adapter

**D57HQLL** .....\$10 per value unit

#### Authentication Adapter

**D57HULL** .....\$10 per value unit

#### Kiosk Adapter

**D57IILL** .....\$25 per value unit

### IBM Tivoli Federated Identity Manager

Identity management and access control solution. Accelerates and secures the integration of companies and their business partners. Through federated single sign-on, business ecosystems can integrate their users in an efficient, security-rich and economic manner, while providing a streamlined user experience. By securing Web services, companies can integrate application platforms both within their enterprise and with their business partners.

**D54YHLL** .....\$69 per value unit

**ibm.com/software/catalog/security**

Prices shown are the suggested retail price and include 12 months of software maintenance. Additional savings on volume purchases and trade up options may apply. Published October 2006. Prices current as of publication date and subject to change.

*“With IBM Tivoli software, we can simplify and streamline identity management processes while creating a robust SOA that vastly improves our efficiency and helps us easily adjust to evolving business needs.”*

**Stephen Swann,**  
**Manager, Access Control and**  
**Integration (ACI) Engineering Room,**  
**European Business Systems,**  
**National Australia Group UK**

## IBM Tivoli Directory Server

Provides a powerful Lightweight Directory Access Protocol (LDAP) identity infrastructure that is the authoritative data source for identity management and advanced services like WebSphere Portal solutions. Built on the robust, proven DB2 data engine, it offers advanced replication capabilities and a high-performance proxy server for massive scalability.

**D56L1LL .....\$100 per value unit**

## IBM Tivoli Identity Manager

Security-rich, automated and policy-based solution that helps effectively manage user accounts and access permissions and passwords from creation to termination across heterogeneous environments. Helps enterprises better capture user and account information, and enhance visibility into security management operations.

**D52E5LL .....\$40 per value unit**

### Applications

**D52EHLL .....\$19 per value unit**

### Host

**D52ELLL .....\$25 per value unit**

## IBM Tivoli Risk Manager

Centrally manage security incidents and vulnerabilities across an enterprise from a single security console. Helps avoid clutter, such as false positives, while quickly identifying and managing security incidents and vulnerabilities to help administrators respond with adaptive security measures.

**D56J2LL .....\$13.40 per value unit**

## IBM Tivoli Security Compliance Manager

An early warning system for organizations looking to identify security policy violations and potential security vulnerabilities. Helps organizations define consistent security policies based on internal or industry standards and then monitor compliance.

**D56AWLL .....\$30 per 10 value units**

Admit it. You've never had a truly effective way to manage your source code and documents. A repository, so to speak. And the "workflow" for software development involves Someone in Testing (see right) who always says, "I think Bob needs to see it next."

This just in: IBM can help you accelerate your global software delivery. Read on.

## Software development

### Build and release management

**NEW!** **IBM Rational Build Forge**  
Automates software delivery through an adaptive build and release management framework that helps development standardize repetitive tasks, manage compliance and share information. Integrates into your current environment, supports major development languages, scripts and tools regardless of platform. Distributed development teams are enabled through a centralized Web-based interface — accessible virtually anytime, anywhere.

<b>Standard Edition/Server</b>	
D59BCLL .....	\$105,000
<b>Enterprise Edition/Server</b>	
D59BQLL .....	\$155,000
<b>Standard Edition</b>	
D59BELL .....	\$1,350 per authorized user
D59BHLL .....	\$2,365 per floating user
<b>Enterprise Edition</b>	
D59BULL .....	\$1,350 per authorized user
D59BWLL .....	\$2,365 per floating user

### Change and configuration management

#### IBM Rational ClearCase®

Manages and controls software assets across the life cycle. Sophisticated version control, automated workspace management, parallel development support, transparent real-time access to files and directories, build and release management, and support for mainframe and midrange development help you improve productivity and deliver applications faster. Heterogeneous, cross-platform support; local, remote and Web interfaces; and integration with leading IDEs enable easy access from the environments and locations you need.

D5315LL .....	\$4,125 per floating user
---------------	---------------------------

#### IBM Rational ClearCase MultiSite®

An option to Rational ClearCase that supports distributed access to software assets through automatic replication and synchronization of Rational ClearCase repositories.

D531KLL .....	\$1,500 per floating user
---------------	---------------------------

#### IBM Rational ClearCase LT

Version control tool for small, local development teams. Easy to install and manage, it supports parallel development, automated workspace configuration and disconnected usage on Linux, Windows and UNIX platforms. Local, remote and Web interfaces and integration with leading IDEs enable access virtually anywhere, anytime.

D531ELL .....	\$1,720 per floating user
---------------	---------------------------

#### IBM Rational ClearQuest®

Provides change management across the software life cycle. Process automation helps create repeatable, enforceable and predictable processes. Defect and change tracking helps document and manage issues to completion. Electronic signatures, user authentication and audit trails help meet regulatory compliance requirements. Integration with requirements, development, build, test and deployment tools enables full life-cycle traceability. Local, remote and Web interfaces and integration with leading IDEs enable access virtually anytime, anywhere.

D53NSLL .....	\$1,620 per authorized user
D531LLL .....	\$4,535 per floating user

#### IBM Rational ClearQuest MultiSite

An option to Rational ClearQuest that supports distributed access to software assets through automatic replication and synchronization of Rational ClearQuest repositories.

D531SLL .....	\$1,370 per floating user
---------------	---------------------------

#### **NEW!** IBM Rational ClearQuest and Functional Testing

See description, part number and pricing on page 30.

## INSIDE

<b>IBM Express Middleware</b>	7
<i>Address the needs of midsize organizations with specially designed, affordable offerings.</i>	
<b>Application servers</b>	10
<i>Run interoperable applications on a proven, security-rich, flexible platform.</i>	
<b>Business integration</b>	11
<i>Provide a centralized infrastructure for application integration and business process automation.</i>	
<b>Commerce</b>	15
<i>Facilitate tailored marketing, sales and order processing with an integrated package.</i>	
<b>Information management</b>	16
<i>Store, access and analyze data in any environment.</i>	
<b>Messaging applications</b>	22

**ibm.com/software/catalog/development**

Prices shown are the suggested retail price and include 12 months of software maintenance. Additional savings on volume purchases and trade up options may apply. Published October 2006. Prices current as of publication date and subject to change.

*“We recognized early on that adopting Rational ClearCase and ClearQuest would provide everybody in the organization with the ability to effectively track issues and manage their source code and documents. In addition, our teams can use a solid, customizable solution to build software and create a workflow environment that is most effective for their development.”*

**Bill Gellerstedt,**  
CTO,  
Enterprise Architecture

## Design and construction

### IBM Rational Data Architect

A comprehensive data modeling and integration design tool that helps data architects understand information assets, map assets to each other and create database and integration schemas. This product is integrated with other facets of the life cycle, including requirements and version management, and provides flexibility to easily design anything from a simple relational database to a complex federated database.

**D56SGLL** .....\$5,000 per authorized user  
**D56SMLL** .....\$8,750 per floating user

### IBM Rational Data and Application Modeling Bundle

Bundle of IBM Rational Data Architect and IBM Rational Software Modeler that combines enterprise data modeling, integration and development capabilities with UML visual application modeling tools for the developer responsible for both data and application development.

**D57T4LL** .....\$5,995 per authorized user  
**D57T0LL** .....\$10,495 per floating user

### IBM Rational Application Developer for WebSphere Software

A comprehensive, integrated development environment optimized for rapidly designing, developing, analyzing, testing, profiling and deploying applications to WebSphere Application Server using Java, J2EE, Web, Web services, service oriented architecture and portal technologies. Under a new name, this is the newest version of WebSphere Studio Application Developer technology.

**D54N4LL** .....\$4,000 per authorized user  
**D54SDLL** .....\$2,155 per fixed-term authorized user  
**D54NBLL** .....\$7,000 per floating user

### IBM Rational Professional Bundle

Includes all the desktop tools an enterprise needs to design, construct and test J2EE, portal and service oriented applications on both Windows and Linux, and test .NET applications. This single bundle provides eight powerful software tools and only requires one maintenance contract to manage. Provides complete flexibility for individual practitioners, who can install and use only the tools they need to do their job.

**D54KALL** .....\$7,000 per authorized user  
**D54S5LL** .....\$3,770 per fixed-term authorized user  
**D54KDLL** .....\$12,625 per floating user

### IBM Rational Rose® Technical Developer

A robust, model-driven development solution that supports the most advanced modeling constructs, including model execution and fully executable code generation. Provides fully automated design-to-code translation for Java, C and C++, runtime model execution, fully executable code generation and visual debugging. Automatically builds drivers, stubs, test harnesses and actual test scripts.

**D53PDLL** .....\$5,995 per authorized user  
**D533CLL** .....\$10,515 per floating user

### IBM Rational Software Architect

Unifies all aspects of architecture and development into one powerful and easy-to-use design and development tool. Leverages model-driven development with UML, enabling users to create well-architected applications and services. Built on top of the open and extensible Eclipse platform, it leverages open industry standards.

**D54LILL** .....\$5,500 per authorized user  
**D54S7LL** .....\$2,965 per fixed-term authorized user  
**D54LALL** .....\$9,625 per floating user

### IBM Rational Suite® for Technical Developers

A full life-cycle solution for developers who create code for the most challenging products and systems, such as real-time and embedded applications. Provides complete cross-functional support through product integration and workflow to optimize real-time and embedded development, and includes Rational Team Unifying Platform™ to manage development across the life cycle.

**D5320LL** .....\$22,860 per floating user

### IBM Rational Suite Development Studio for UNIX

A full life-cycle solution consisting of analyst, developer and tester products. Unifies cross-functional teams through key product integration and workflow, and supports UNIX software projects, from requirements to release. Includes Rational Team Unifying Platform to manage development across the life cycle.

**D5331LL** .....\$14,435 per floating user

### IBM Rational Systems Developer

Leverages all the power of Eclipse, and then includes plug-ins that enable software architects and model-driven developers to create well-architected C/C++ and Java J2SE applications using Unified Modeling Language, Version 2 (UML 2).

**D555FLL** .....\$2,495 per authorized user  
**D555BLL** .....\$4,365 per floating user

## IBM Rational Web Developer

A visually driven, integrated development environment that simplifies and accelerates the development, testing and deployment of applications to WebSphere Application Server using Web, Web services and service oriented architecture technologies. Under a new name, this is the newest version of WebSphere Studio Site Developer technology.

**D54NHLL** .....\$1,000 per authorized user  
**D54SBLL** .....\$540 per fixed-term authorized user  
**D54NMLL** .....\$1,750 per floating user

## IBM Lotus Domino Designer

Allows developers to rapidly build Lotus Domino-based multiplatform applications to help streamline business processes and increase workflow efficiency. Includes all the messaging and collaboration capabilities of the IBM Lotus Notes for Collaboration client plus a comprehensive, easy-to-use application development environment that leverages open standards.

**D53CSLL**.....\$756 per user

## IBM Workplace Designer

A standards-based development tool that script developers, Lotus Domino application designers, Microsoft Visual Basic® developers and others can use to easily create components for the IBM Workplace environment, supporting a service oriented architecture.

**D5592LL** .....\$649 per user

## IBM Lotus Workflow

A stand-alone application development tool that works with Lotus Domino and speeds the creation and deployment of workflow-oriented applications. Allows organizations to standardize and streamline time-consuming, people-based activities and track their progress.

**D52E1LL**.....\$95 per user

## IBM Lotus Enterprise Integrator for Domino

See description, part number and pricing on page 12.

## IBM Lotus Connector for SAP Solutions

See description, part number and pricing on page 12.

## **NEW!** IBM Workplace for SAP Software

See description, part number and pricing on page 11.

## IBM WebSphere Portlet Factory

See description, part number and pricing on page 24.

## **NEW!** IBM Workplace Dashboard Framework

See description, part number and pricing on page 24.

## Process and portfolio management

### IBM Rational Portfolio Manager

Manages portfolio value by aligning portfolio investments with business goals. Offers holistic, end-to-end visibility across the enterprise, providing portfolio oversight and control of projects, resources, costs, demand, services, assets, risks and returns. An extensive reporting capability that provides the data required for informed decision making and project execution enables organizations to achieve better governance and optimize investment returns.

**D540XLL**.....\$2,500 per authorized user  
**D540ZLL** .....\$750 console per authorized user  
**D5411LL** .....\$100 time and expense per authorized user

### IBM Rational Method Composer

The next evolution of the IBM Rational Unified Process®, providing a process solution that goes beyond software development. A flexible process platform built on top of the Eclipse Process Framework that contains tooling, process libraries and unified method architecture for use throughout IT life-cycle management (ITLM).

**D532ILL** .....\$395 per authorized user

### IBM Rational Team Unifying Platform

Provides teams with complete, integrated life-cycle management, including tools, process guidance and traceability to manage activities and assets across teams and projects—including requirements management, change management, test management and automated project metrics.

**D53NHLL** .....\$4,120 per authorized user

### IBM Rational Suite

Provides a full life-cycle solution of analyst, developer and tester products to unify cross-functional teams from requirements to release.

**D53PHLL** .....\$9,620 per authorized user  
**D5337LL** .....\$19,245 per floating user

## Requirements and analysis

### IBM Rational RequisitePro®

An easy-to-use requirements and use case management tool that lets teams author and share their requirements using familiar document-based methods and leverage database-enabled capabilities such as requirements traceability and impact analysis. The result: better communication and management of requirements with an increased likelihood of completing projects on time, within budget and above expectations.

**D53NZLL**.....\$2,120 per authorized user  
**D5326LL** .....\$4,120 per floating user

*“Rational Performance Tester has been tremendous in helping us identify bottlenecks and work through them so our users never have to experience them.”*

**Mark Robinson,**  
Assistant Vice President,  
Information Systems  
Administration Unit

## IBM Rational Rose Data Modeler

A visual modeling tool that makes it possible for database designers, analysts, architects and developers to work together, capture and share business requirements and track them as they change throughout the process. Provides the realization of the Entity Relationship (ER) methodology using UML notation to bring database designers together with the software development team.

D53NJLL .....\$2,495 per authorized user  
D532KLL .....\$4,365 per floating user

## IBM WebSphere Business Modeler

See description, part numbers and pricing on page 13.

## IBM WebSphere Business Monitor

See description, part number and pricing on page 13.

## IBM Rational Software Modeler

Architects, system analysts and designers are responsible for specifying and maintaining various views of a system under development. This visual modeling and design tool enables users to clearly develop and communicate their designs using UML, the industry-standard system modeling language. Built on top of the open and extensible Eclipse platform, it leverages several open industry standards to provide an unprecedented level of extensibility.

D54L7LL .....\$1,795 per authorized user  
D54S9LL .....\$970 per fixed-term authorized user  
D54L4LL .....\$3,120 per floating user

## Software quality

### **NEW!** IBM Rational ClearQuest and Functional Testing

A comprehensive quality and change management bundle that offers testing teams integrated, centralized access for test management, defect management, and automated and manual functional testing.

D589VLL .....\$6,060 per authorized license user  
D589ALL .....\$11,635 per floating license user

## IBM Rational Manual Tester

Innovative manual test authoring and execution tool for business analysts and testers struggling to optimize the quality and accelerate the execution of their manual testing efforts. Provides a fully customizable rich text editor to optimize test clarity, and introduces a novel test step reuse palette to minimize the impact of application change on test script maintenance.

D54MXLL .....\$1,500 per authorized user  
D54SFLL .....\$810 per fixed-term authorized user  
D54MDLL .....\$2,995 per floating user

## IBM Rational Functional Tester

Top analyst-rated tool for automating the functional and regression testing of Java, VS.NET and Web-based applications. Overcomes test automation roadblocks with advanced features, including self-correcting test scripts and data-driven test assistance. Runs on Windows and Linux platforms. Ships with a copy of Rational Manual Tester and enables you to download entitlements to Rational TestManager and Rational ClearCase LT.

D53NFLL .....\$4,120 per authorized user  
D54SHLL .....\$2,200 per fixed-term authorized user  
D530BLL .....\$7,930 per floating user

### Extension for Terminal-based Applications

D53ZXLL .....\$1,245 per authorized user  
D53ZVLL .....\$2,375 per floating user

### Extension for Siebel Test Automation

D554HLL .....\$2,500 per floating user

## IBM Rational Functional Tester Plus

Bundles Rational Functional Tester and Rational Robot for automated functional and regression testing for a wide variety of client/server technologies, including VS.NET, C/C++, Java, Web and packaged applications such as thick-client Oracle Forms, Sybase PowerBuilder and Borland Delphi.

D57N2LL .....\$10,305 per floating user  
D57NBLL .....\$5,365 per authorized user

## IBM Rational Robot

A versatile, automated functional and regression testing tool for teams working with a wide variety of client/server technologies, including packaged applications such as thick-client Oracle Forms, Sybase PowerBuilder and Borland Delphi. Includes an easy-to-learn test scripting language and extensible test control support. Ships with a copy of Rational TestManager.

**D53NDLL** .....\$4,120 per authorized user  
**D52ZFLL** .....\$7,930 per floating user

## IBM Rational Performance Tester

A load- and performance-testing solution for teams concerned about the scalability of their Web-based, J2EE, Siebel and SAP applications. Combines multiple ease-of-use features with deep detail, and simplifies the test creation, load generation and data collection processes that help teams ensure their applications can accommodate required user loads.

**D54LRLL**.....\$1,500 per authorized user  
**D54LTLL** .....\$2,995 per floating user

### Extension for SAP Solutions

**D56TBLL**.....\$37,500 per floating user

### Extension for Siebel Test Automation

**D554ELL**.....\$37,500 per floating user

### Extension for Citrix Presentation Server

**D56TXLL**.....\$37,500 per floating user

## IBM Rational PurifyPlus™

A suite of runtime analysis tools built for developers who need to optimize application reliability and performance on Windows, Linux and UNIX platforms. Pinpoints memory leaks, profiles application performance and analyzes code coverage for Java, C/C++, Visual Basic and managed .NET languages, including C# and VB.NET.

### Windows

**D5304LL**.....\$1,370 per authorized user

### Linux and UNIX

**D52ZYLL**.....\$5,495 per authorized user

### Enterprise Edition

**D52ZDLL**.....\$12,370 per floating user

## IBM Rational Purify®

A highly scalable, nonintrusive memory leak and memory corruption detection tool. Analyzes Java, C/C++, Visual Basic and managed .NET languages, including C# and VB.NET. Also ships as part of Rational PurifyPlus.

### Windows

**D53QNLL**.....\$780 per authorized user

### Linux and UNIX

**D53QQLL** .....\$2,465 per authorized user

## IBM Rational Test RealTime

A component testing and runtime analysis solution for embedded, real-time and other cross-platform software development. Performs memory leak detection, code coverage analysis, bottleneck exposure and unit testing for C, C++, Java and Ada in an embedded environment—from an 8-bit microchip to a 64-bit RTOS—using an innovative, customizable target deployment technology.

**D52ZBLL**.....\$13,235 per floating user

Compliance policies. Regulatory laws. Accountability reports. Every year, there's more and more data to store. And less room. In fact, the really helpful "answer" Management (see left) now offers seems to be: Store it all. Not only do you have to find a place to store the data, you have to find a way to retrieve it.

Sound familiar? Then let us introduce you to the joys of storage management.

## Storage management

*"Had we not been using IBM Tivoli Storage Management software, the chances of us collecting the data would have probably been nil. Tivoli software enabled us to help our client protect its trade secrets and maintain its position in the industry."*

Jeffrey Beallor,  
President,  
Global Data Vaulting

### IBM Tivoli Storage Manager

Protects an organization's data from hardware failures and other errors by storing backup and archive copies of data on offline storage. Scales to protect hundreds of computers running dozens of operating systems.

D5127LL .....\$345 per processor

D5158LL .....\$65 per client

### IBM Tivoli Storage Manager Extended Edition

Expands on the base product of Tivoli Storage Manager by adding a disaster-planning capability, Network Data Management Protocol control for network-attached storage filers and support for large tape libraries.

D51MFLL.....\$620 per processor

D51MKLL .....\$65 per client

### IBM Tivoli Storage Manager for Application Servers

Provides a software module that works with Tivoli Storage Manager to protect the infrastructure and application data and optimize the availability of WebSphere Application Server (see page 10) to provide an applet GUI to perform reproducible, automated online backup of a WebSphere Application Server environment.

D510BLL.....\$1,190 per processor

### IBM Tivoli Storage Manager for Databases

Provides a software module that works with Tivoli Storage Manager to protect a wide range of application data by protecting underlying database management systems holding that data. Exploits backup-certified utilities and interfaces provided for Oracle, Microsoft SQL Server and Informix.

D510ELL .....\$714 per processor

### IBM Tivoli Storage Manager for Copy Services

Integrates with Microsoft Exchange Volume Shadow Copy Service architecture to integrate hardware- and software-based snapshot capabilities with Tivoli Storage Manager and other data protection modules to perform high-efficiency data backups and archives of business-critical applications. Virtually eliminates performance impacts on the host.

D57HBLL.....\$597 per processor

### IBM Tivoli Storage Manager for Advanced Copy Services

For IBM AIX® environments, integrates hardware- and software-based snapshot capabilities with Tivoli Storage Manager and other data protection modules to perform high-efficiency data backups and archives of business-critical applications. Virtually eliminates performance impacts on the host. Extends IBM FlashCopy® support in IBM Tivoli Storage Manager for Hardware to include support for SAN volume controller, DS6000 and DS8000 devices.

D56UALL .....\$1,782 per processor

### IBM Tivoli Storage Manager for Enterprise Resource Planning

Captures reliable online full or differential recovery points for application servers and feeds the backup data into the Tivoli Storage Manager hierarchy.

D512QLL.....\$1,188 per processor

### IBM Tivoli Storage Manager for Mail

Provides a software module for Tivoli Storage Manager that automates the data protection of e-mail servers running either Lotus Domino or Microsoft Exchange. Uses APIs provided by e-mail application vendors to perform online “hot” backups without shutting down the e-mail server.

D5102LL .....\$1,190 per processor

### IBM Tivoli Storage Manager for Space Management

Automatically and transparently migrates rarely accessed files to Tivoli Storage Manager storage.

D51N1LL.....\$1,485 per processor

### IBM Tivoli Storage Manager for Storage Area Networks

Extension that introduces storage agents to allow both server and client computers to make the bulk of backup/restore and archive/retrieve data transfers over the SAN instead of the LAN, either directly to tape or to the Tivoli Storage Manager disk storage pool.

D51MULL.....\$1,190 per processor

D51MYLL.....\$65 per client

### IBM Tivoli Storage Manager for System Backup and Recovery

Provides a flexible backup method for AIX systems, helps protect data and offers bare metal restore capabilities. Also includes a comprehensive system backup, restore and reinstallation tool.

D521YLL.....\$295 per processor

### IBM Tivoli Storage Manager HSM for Windows

Moves inactive Windows files to a hierarchy of lower-cost storage, based on user policy, to save costly server space and help minimize backup and recovery times.

D55H5LL.....\$1,200 per terabyte

### IBM Tivoli System Storage Archive Manager

Facilitates compliance with the most stringent regulatory requirements by helping manage and simplify the retrieval of data. Provides data retention policies that help meet new regulations requiring additional safeguards on data retention.

D551LLL.....\$1,200 per terabyte

### IBM Tivoli Continuous Data Protection for Files

Provides real-time, continuous data protection designed specifically for laptops and desktops. Instead of waiting for scheduled intervals, it backs up users’ most important files the moment they are saved.

D55H9LL .....\$995 per processor

D5964LL .....\$875 per client license 25-pack

### Storage infrastructure management

#### **NEW!** IBM Tivoli Storage Process Manager

Provides a holistic view of storage changes within an infrastructure. Automates tasks that have traditionally been performed manually. A set of customizable, IT Infrastructure Library® (ITIL®)-aligned workflows helps optimize storage utilization, prioritize storage incidents and establish storage policies. Provisions storage to minimize impact to SLAs and uses best practices to align storage processes to storage policies and procedures.

D58MXLL .....\$8 per value unit

### IBM TotalStorage® Productivity Center for Data

Provides a set of policy-driven automated tools for managing storage capacity, availability, events and assets in an enterprise environment, including DAS, NAS and SAN technologies. Because it is policy-based, this intelligent console for the storage environment uses autonomic self-healing and self-configuring capabilities to detect potential problems and automatically make adjustments based on established policies and actions.

D54V6LL .....tiered pricing starting at \$5,560 per terabyte

### IBM TotalStorage Productivity Center for Fabric

Part of the IBM TotalStorage Productivity Center, it provides a single standards-based solution for SAN management and includes automatic device discovery, real-time monitoring of performance and availability, and alerts, zone control and SAN error prediction capabilities.

D54V4LL .....tiered pricing starting at \$2,000 per terabyte

For more information:  
**ibm.com/software/catalog/storage**

Prices shown are the suggested retail price and include 12 months of software maintenance. Additional savings on volume purchases and trade up options may apply. Published October 2006. Prices current as of publication date and subject to change.

*“The cost of the IBM solution is insignificant compared with the potential cost of not having our data well protected. With the robust Tivoli and TotalStorage solution, we have strengthened our business while cutting out a vast amount of unstructured manual administration.”*

**Carlos Martinez,**  
CIO,  
BBK

### **IBM TotalStorage Productivity Center for Disk**

Part of TotalStorage Productivity Center, it minimizes the complexity of managing SAN storage devices by allowing administrators to configure, manage and monitor the performance of their storage from a single console.

**D54QGLL** .....tiered pricing starting at \$3,000 per terabyte

### **IBM TotalStorage Productivity Center Standard Edition**

Get the best value for your storage infrastructure with this bundle that includes TotalStorage Productivity Center for Data, TotalStorage Productivity Center for Fabric and TotalStorage Productivity Center for Disk in a single package.

**D54THLL** .....tiered pricing starting at \$6,500 per terabyte

### **IBM TotalStorage Productivity Center for Replication**

Part of TotalStorage Open Software Family, it is designed to simplify and optimize the configuration and management of flash copy replication and migration services on network storage devices.

**D58FKLL** .....tiered pricing starting at \$4,000 per terabyte

### **IBM TotalStorage Productivity Center for Replication Two Site BC**

Part of TotalStorage Open Software Family, it is designed to simplify and optimize the configuration and management of two site business continuance copy services on network storage devices. Available for purchase via a tiered pricing scheme. IBM TotalStorage Productivity Center for Replication is a prerequisite to this product.

**D58EYLL** .....tiered pricing starting at \$6,000 per terabyte

### **IBM System Storage SAN Volume Controller**

Storage virtualization offering will help improve application availability, optimize storage resource utilization and greatly enhance storage management personnel productivity. Helps eliminate many of the causes of storage-related application downtime. Provides the administrator with the capability to combine islands of capacity into a single storage pool. Available for purchase via a tiered pricing scheme. This software operates only on IBM System Storage SAN Volume Controller hardware. Orders for both hardware and software must be placed at the same time.

**Call for pricing**

We know: you hate running all over the place trying to get a handle on server performance. But there are these little things called key performance indicators that Someone (mugshot shown here) told you to collect. Your team can't be everywhere at once. You need a consolidated view. A console. If you could get your hands on that, you'd be miles ahead of the game.

Check out the productivity tools on these pages.

## Systems management

### IBM Tivoli Monitoring

Automates monitoring of essential system resources to detect bottlenecks and potential problems, and enables automatic recovery from critical situations. Can also help increase the availability of servers.

**D561YLL .....\$70 per 10 value units**

### IBM Tivoli Monitoring for Virtual Servers

Centrally monitors server virtualization and consolidates resource performance and availability. Uses advanced resource models for problem identification, notification and correction, and provides tasks to automate and execute daily and routine operations. Includes three Proactive Analysis Components (PACs) that support the Citrix MetaFrame Access Suite, VMware ESX and Microsoft Virtual Server.

**D550GLL.....\$1,000 per processor**

### IBM Tivoli Composite Application Manager for WebSphere

Helps maintain the availability and performance of on demand applications. Quickly pinpoints, in real time, the source of bottlenecks in application code, server resources or external system dependencies. Enables viewing of all J2EE transactions that are "in flight" (that have not finished execution), correlating and profiling transactions that span multiple subsystems, analyzing application performance and setting resource or application traps.

**D570XLL.....\$102.50 per value unit**

### IBM Tivoli Composite Application Manager Basic for WebSphere

A self-contained monitoring solution helps you maintain the availability and performance of WebSphere applications by pinpointing the source of bottlenecks or other defects in application code, server resources or external system dependencies.

**D57UMLL .....\$25 per 10 value units**

### IBM Tivoli Composite Application Manager for SOA

Monitors, manages and controls the Web services layer of IT architectures while drilling down to the application or resource layer to identify the source of bottlenecks or failures, and to pinpoint services that take the most time or use the most resources.

**D570BLL .....\$50 per value unit**

### IBM Tivoli Composite Application Manager for Response Time Tracking

Monitors transaction performance and availability to provide a positive customer experience. Offers a comprehensive display of an end-user transaction path.

**D562MLL .....\$62 per value unit**

### IBM Tivoli NetView®

Discovers TCP/IP networks, displays network topologies, correlates and manages events and SNMP traps, monitors network health, identifies root causes of network failures and gathers performance data.

**D55YELL .....\$105 per 10 value units**

**D515NLL.....\$5.25 per node install**

### IBM Tivoli OMEGAMON® XE for Messaging

Makes it easy to determine the availability and performance of critical messaging and business process components for managing and monitoring WebSphere MQ, WebSphere MQ Integration Broker and WebSphere InterChange Server. Monitors the status of key components and provides comprehensive monitoring and management capabilities with robust security features through a powerful set of tools. Supports WebSphere MQ, Version 6.

**D56PNLL .....\$24 per value unit**

## INSIDE

<b>IBM Express Middleware</b>	<b>7</b>
<i>Address the needs of midsize organizations with specially designed, affordable offerings.</i>	
<b>Application servers</b>	<b>10</b>
<i>Run interoperable applications on a proven, security-rich, flexible platform.</i>	
<b>Business integration</b>	<b>11</b>
<i>Provide a centralized infrastructure for application integration and business process automation.</i>	
<b>Commerce</b>	<b>15</b>
<i>Facilitate tailored marketing, sales and order processing with an integrated package.</i>

For more information:  
**ibm.com/software/catalog/sysmgmt**

Prices shown are the suggested retail price and include 12 months of software maintenance. Additional savings on volume purchases and trade up options may apply. Published October 2006. Prices current as of publication date and subject to change.

*“The openness of Tivoli Provisioning Manager makes it ideal for companies that have a finite number of technologies in their environments, as well as software development firms that may not know what they’ll need to install next.”*

**Phil Buckellew,**  
Program Director,  
IBM Tivoli Development Labs

## IBM Tivoli Business Systems Manager

Helps automate IT management processes by enabling effective prioritization of IT actions, communication to business units in real time and historically, and planning for investments and changes. Uses an executive dashboard to provide information about key business services, display business service availability and analyze root causes in real time.

**D55S8LL .....\$65.60 per 10 value units**

## IBM Tivoli Enterprise Console®

Provides sophisticated, automated problem diagnosis and resolution to optimize system performance and minimize support costs. The auto-discovery feature allows users to understand the environment and process events appropriately. The Web console enhances visualization while providing remote access to events and console operations.

**D55ZFL .....\$21.30 per value 10 units**

## IBM Tivoli License Compliance Manager

This software asset management solution provides advanced software inventory, monitors use and includes contract and reporting capabilities to help organizations effectively manage their software licenses and contracts. Fully integrates with Tivoli Configuration Manager.

**D561CLL .....\$2.50 per 10 value units**

## IBM Tivoli System Automation for Multiplatforms

Now available with two orderable components. The base component provides high availability for mission-critical Linux- and AIX-based business applications and middleware. The end-to-end component provides automated operations for high availability across entire multitiered, distributed and heterogeneous business applications that span any combination of IBM z/OS®, Linux and AIX environments.

**Base**

**D56KDLL .....\$110 per 10 value units**

**End-to-end**

**D56ZJLL .....\$18 per value unit**

## IBM Tivoli Service Level Advisor

Helps customers by automating their service level management so that administrators spend less time managing service level agreements (SLAs), responding to reporting requirements and addressing service outages and degradations. The result is more effective IT performance and availability management through improved quality of service delivery as well as maximized productivity of both IT staff and customers.

**D56D5LL .....\$47.30 per 10 value units**

## IBM Tivoli Switch Analyzer

Discovers and manages complex switched networks and quickly pinpoints problems through root cause analysis. Extends Tivoli NetView capabilities to provide analysis of routers and switches.

**D55XULL .....\$50 per value unit**

**D515KLL .....\$20 per port**

## IBM Tivoli Configuration Manager

An integrated solution for deploying software, automating patch management for Windows environments, and tracking hardware and software configurations. After systems have been deployed, the inventory module lets users automatically scan for and collect hardware and software configuration information from computer systems across an enterprise.

**D55SDLL .....\$85.90 per 10 value units**

**D515SLL .....\$48.30 per client**

## IBM Tivoli Provisioning Manager

Helps efficiently and effectively respond to changing demands on infrastructure resources while keeping server and desktop software compliant across the enterprise. Provisions and configures servers, operating systems, middleware, applications and network devices acting as routers, switches, firewalls and load balancers. Uses workflows to automate the manual provisioning and deployment process.

**D52UVLL .....\$1,100 per CPU**

**D52VHLL .....\$50 per network node**

**D585YLL .....\$65 per client**

## **NEW!** IBM Tivoli Provisioning Manager for OS Deployment

An easy-to-use console for remote deployment and management of operating systems. Includes flexible alternatives for creating and managing operating system—cloned or scripted install. This can significantly reduce the number of images required across your environment as well as the effort required to manage them.

**D59L2LL .....\$6 per value unit**

**D59L4LL .....\$20 per client**

## IBM Tivoli Intelligent Orchestrator

Continually evaluates real-time IT resource status and dynamically responds based on business priorities. Provisions IT resources utilizing automated decision making based on customer best-practice policies and workflows. Aligns IT resources to business policies to help reduce hardware, software and IT staff costs.

**D52UXLL .....\$1,400 per CPU**

**D52VJLL .....\$150 per network node**

## IBM Tivoli Workload Scheduler

Automates, monitors and controls the workflow through an enterprise's IT infrastructure on both local and remote systems. From a single point of control, analyzes the status of the production work and drives workload processing according to installation business policies.

**D56MTLL** .....\$29.50 per value unit

## IBM Tivoli Workload Scheduler for Applications

Integrates the scheduling features of Tivoli Workload Scheduler to on demand business application environments. Leverages built-in workload capabilities of Oracle e-Business Suite, PeopleSoft 8, SAP R/3 and SAP Business Warehouse.

**D56NCLL** .....\$17.50 per value unit

## IBM Tivoli IntelliWatch®

Provides a comprehensive system management solution for Lotus Domino. Offers a wide range of features, including automated problem detection and correction, system-wide product configuration options, custom statistics and reporting capabilities, and fault recovery.

**D55VULL** .....\$15 per value unit

## IBM Tivoli Application Dependency Discovery Manager

Provides agentless discovery of infrastructure configurations and maps relationships between application components.

**D575LLL** .....\$75,000 per install

**D575NLL** .....\$22.50 per value unit

## **NEW!** IBM Tivoli Unified Process Composer

Provides detailed documentation of IT Service Management processes based on industry best practices, enabling users to significantly improve their organization's efficiency and effectiveness. Tivoli Unified Process Composer is also bundled with Tivoli Change and Configuration Management Database.

**D58G5LL** .....\$1,495 for 10 authorized users

## **NEW!** IBM Tivoli Composite Application Manager for J2EE Operations

When combined with the Netcool® suite or Tivoli Monitors, Tivoli Composite Application Manager for J2EE Operations delivers centralized management of network devices, systems and applications to provide comprehensive, end-to-end management of the customer's environment.

**D59B5LL** .....\$4,000 per managed server

## **NEW!** IBM Tivoli Composite Application Manager for ISM

A suite of 23 highly scalable monitors designed to test Internet services from the end user's perspective. Directly measures the availability, performance and content of these services through periodic polling from strategically distributed points of presence.

**D59DOLL** .....\$10,000 per protocol per server

## **NEW!** IBM Tivoli Change and Configuration Management Database (CCMDB)

At the core of the IBM Service Management strategy, it provides an enterprise-ready configuration management database and platform upon which you can standardize and share information that helps you integrate people, processes, information and technology. Helps you automatically discover and federate IT information spread across the enterprise, including details about servers, storage devices, networks, middleware, applications and data.

**D583VLL** .....\$75,000 per install

**D583XLL** .....\$22.50 per value unit

## **NEW!** IBM Tivoli Release Process Manager

Provides a process-based solution to address the domain of release management as defined by ITIL. Automates complex deployments in the context of the overall release management process, allowing assessment of business impact before release. Enables efficient management of new and upgraded software — as well as related hardware releases — for both server provisioning and patch deployment.

**D584ULL** .....\$20 per value unit

## **NEW!** IBM Tivoli Availability Process Manager

Delivers visibility into IT components, applications and their business impact to provide IT organizations with the necessary tools for the effective diagnosis and prioritization of incidents and problems that impact mission-critical business services. Designed to improve the efficiency and effectiveness of incident and problem management, it ensures that the right experts are deployed at the right time — for optimal time to resolution and maximized IT fixed-cost efficiencies.

**D58C2LL** .....\$19.50 per value unit

**PAIN:**  
Inaccessible  
wireless data

If only you had a nickel for every time Someone in Sales complained her e-mail was down (Mrs. Sales Complainer shown here), or she couldn't access the server. You'd have a lot of nickels. Everyone needs the same access — at the same time. You need a way to get remote employees just as connected as those in the office. Without building a new infrastructure.

If this is your pain, read about the products on this page.

## Wireless — voice — pervasive

*“Now all the field staff need to do is make their changes from wherever they are working, and the central database is updated automatically. With Lotus Domino we have eliminated much of the manual work, and reduced the operational workload for the IT administration staff, too.”*

Lutz Kemsies,  
Head of Sales and  
Project Management,  
Collonil

### **NEW!** IBM DB2 Everyplace Enterprise Edition 9

The next-generation of mobile data stores, providing a full enterprise synchronization solution to integrate enterprise and mobile information — from any location or source, at any time, right in the palm of your hand.

D52M9LL .....\$187.50 per value unit

### IBM Lotus Domino Everyplace

A wireless solution that gives mobile Lotus Notes and Domino users access to their e-mail, calendars, to-do lists, directories and other applications from virtually anywhere, at any time. Supports multiple mobile devices, including personal digital assistants (PDAs), smartphones and pagers — from a single platform.

D5216LL.....\$75.84 per user

### IBM Lotus Sametime Everyplace

Provides mobile users with instant messaging and awareness capabilities of Lotus Sametime from WAP- and SMS-enabled mobile devices.

D5CT2LL .....\$55 per user

### IBM WebSphere Everyplace Access

Transforms an organization by extending access to critical information and applications using mobile devices.

**Starter Edition (50-user license)**

D52COLL .....\$30,962 per processor

**Enterprise Edition**

D55U6LL .....\$1,052,50 per value unit

### IBM WebSphere Everyplace Connection Manager

Secure, roaming access across a wide variety of networks from a wide variety of devices.

**Starter Edition (50-user license)**

D52CYLL .....\$9,900

### IBM WebSphere Everyplace Deployment

End-to-end platform including a server-managed client, tools and server components to build, deploy and maintain solutions that can adapt to device and network conditions and deliver a rich graphical user interface.

**Starter Edition (50-client license)**

D558TLL .....\$15,200

**Enterprise Edition**

D571JLL .....\$739.50 per value unit

### IBM WebSphere Voice Application Access

Allows customers, suppliers and employees to use any phone to access WebSphere Portal, providing a consistent visual and voice experience for the end user while leveraging the existing portal infrastructure.

Call for information

### IBM WebSphere Everyplace Mobile Portal Enable

Provides browser-based, device-independent access to portal content. Its Intelligent Content Adaptation technology reduces development and maintenance cost. Reduces time to market by automatically adding support for new devices.

D55XJLL .....\$550 per value unit

**WebSphere Everyplace Mobile Device Enable**

D55XLLL .....\$25 per value unit
