

What's new in Adobe Creative Cloud for teams

Creative Cloud for teams gives you the world's best creative tools to do amazing work and drive powerful business results. With the 2015 release, all the apps and assets you need—including Adobe Stock images—are right at your fingertips across desktops and mobile devices. Creative Cloud for teams offers tons of features that are not available in Creative Suite, including new creative tools, performance boosts, and touch workflows to help you work faster. Connected mobile apps extend the power of the desktop to your iOS and Android devices. And best of all, these upgrades are included in your ongoing membership at no additional cost.

Here are some of the latest features in Creative Cloud for teams.

Added June 2015

-  **Adobe Creative Cloud**

Creative Cloud for teams makes collaboration easier than ever, so you can get more done in less time. Thanks to Adobe CreativeSync technology, everything is connected, so you can maintain design consistency across projects, stay on top of changes, and work better together. Securely sync creative files, folders, and settings from your desktop, tablet, and smartphone. Create and share images, brushes, text styles, colors, and more with Creative Cloud Libraries and access them from anywhere. And keep all your assets—including images from the new Adobe Stock service—at your fingertips.

-  **Adobe Stock**

Jump start your creative projects by quickly searching 40 million high-quality images and graphics in the new Adobe Stock image service. It's conveniently integrated into CC desktop apps like Photoshop, Illustrator, InDesign, and more. Just save images to your Creative Cloud Libraries and then access them directly from inside your favorite desktop apps. You can buy Adobe Stock with new Creative Cloud for teams purchases or simply add it to your existing membership.

-  **Adobe Photoshop CC**

Find the perfect image with the brand new Adobe Stock service, and add it directly to your Photoshop designs via your Creative Cloud Libraries. With improved Creative Cloud Libraries, your assets are

always at your fingertips, and you can easily share them with your creative team. Design multiscreen layouts in a single Photoshop file with new artboards. Get real-time previews of your mobile app and mobile web designs with Device Preview. Quickly export your images and designs with New Asset Export. And take advantage of faster performance thanks to Mercury Graphics Engine enhancements.

- **Adobe After Effects CC**

Track faces with exceptional accuracy by managing the level of detail you track. Simple mask tracking lets you quickly apply effects only to a face, such as selective color correction or blurring a face. You can also track specific points on the face such as pupils, mouth, and nose. The new After Effects also lets you work faster with Uninterrupted Previews. View design iterations, adjust properties, and even resize panels without stopping playback of your compositions.

- **Adobe Muse CC**

Adobe Typekit web fonts are now available in the Adobe Muse font menu, giving you direct access to thousands of quality, premium fonts. Download new Adobe Muse add-ons to add new elements to your site, such as a shopping cart, a blog, or tables. You can also add radio buttons and checkboxes to enable site visitors to select single or multiple options in a contact form.

- **Adobe Flash Professional CC**

Animate objects by linking a series of symbols together with the new Bone tool. Stay focused on the timeline and stage with a streamlined workspace for animators. Export all of the bitmaps in your HTML5 Canvas project as a single sprite sheet. Even split audio files directly on the timeline to coordinate blank frames as you animate.

- **Adobe Illustrator CC**

Add a fresh image or graphic to your composition from the new Adobe Stock service in no time right from within Illustrator. Keep your favorite assets handy with improved Creative Cloud Libraries. Pan, zoom, and scroll up to 10 times faster with new performance improvements. View and finesse the finest details in your most demanding artwork with 10 times higher zoom magnification. Quickly create custom graphs, charts, and infographics with Creative Cloud Charts. And now you can recover unsaved work when Illustrator crashes, so you'll never lose a file again.

- **Adobe InDesign CC**

Discover great images with the new Adobe Stock service and quickly add them to your designs by saving them to Creative Cloud Libraries and accessing them directly from InDesign. Share images, colors, brushes, character and paragraph styles and more between InDesign and other Creative Cloud desktop and mobile apps with improved Creative Cloud Libraries. Perform everyday tasks faster than ever with new Mercury Drawing Performance. Place images directly into cells of tables to create tables that have a combination of both text and graphics. And add color or shading to paragraphs.

- **Adobe Premiere Pro CC**

Work with color and light in all new ways with the new Lumetri Color panel. Deliver more polished interviews by smoothing out jump cuts between sound bites with Morph Cut. Capture and assemble video wherever inspiration strikes you using Adobe Premiere Clip, and then step up to the full creative power of Adobe Premiere Pro. Deliver content that is the right duration without time-consuming micro-editing. As you adjust the length of your video, the new Time Tuner automatically adds or removes frames at scene changes, or in sections with still images or low visual activity.

- **Adobe Dreamweaver CC**

Rapidly build and lay out production-ready websites that dynamically adapt to fit various screen sizes, making responsive design a part of your everyday workflow. Preview the appearance of your pages or test interactivity in real-time, so you can see how your design will look and adapt on an actual mobile browser. Quickly turn Photoshop comps into code-based designs with Extract. And work more efficiently with Code Editor tools like code completion, built-in validation, and site-management.

- **Connected mobile apps**

The 2015 release introduces dozens of new innovations to the entire Creative Cloud ecosystem. New mobile apps Adobe Hue, Preview, and Comp make it even easier to capture inspiration and create from anywhere. Mobile apps Shape, Color, and Photoshop Mix are now available for Android. And the entire family of Creative Cloud mobile apps is now more connected than ever.

Plans

Adobe offers two Creative Cloud for teams plans: Complete and Single App. With Complete, you get everything Creative Cloud for teams has to offer, including 100GB of cloud storage and expert support. With Single-App, you get one CC desktop app of your choice and 20GB of cloud storage. And you can add Adobe Stock to your membership to jump-start creative projects.

Complete plan

- All the Adobe CC desktop apps and access to new features as soon as they are available
- 100GB of cloud storage for easy file sharing
- Adobe expert support, including advanced 24/7 tech support for administrators, plus one-on-one access to product experts
- Access to Creative Cloud services, such as Behance ProSite and Typekit
- A centralized Admin Console to easily add, track, and reassign licenses
- Creative Cloud Packager for centrally deploying all Creative Cloud desktop apps, or a customized subset, across your organization

Single-App plan

- One Adobe CC desktop app of your choice (Acrobat and Lightroom excluded) and access to new features as soon as they are available
- 20GB of cloud storage for easy file sharing
- Access to Creative Cloud services, such as Behance ProSite and Typekit
- A centralized Admin Console to easily add, track, and reassign licenses
- Creative Cloud Packager for central deployment

Complete plan with Adobe Stock

- All the Adobe CC desktop apps and access to new features as soon as they are available
- 10 Adobe Stock images per month
- 100GB of cloud storage for easy file sharing
- Adobe expert support, including advanced 24/7 tech support for administrators, plus one-on-one access to product experts
- Access to Creative Cloud services, such as Behance ProSite and Typekit
- A centralized Admin Console to easily add, track, and reassign licenses
- Creative Cloud Packager for centrally deploying all Creative Cloud desktop apps, or a customized subset, across your organization

Adobe Stock add-ons

- Add Adobe Stock to your existing Creative Cloud for teams membership
- Choose either 10 images/month or 750 images/month
- Rollover unused images at the end of each month for up to a year.
